

Vishal Kumar Allam

Chicago, IL | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Software and Data Integration professional with **5+ years of experience** supporting enterprise data conversion, database validation, system integration, SQL development, application troubleshooting, and implementation initiatives across healthcare and SaaS environments.
- Strong hands-on expertise in **MSSQL, SQL, XML, SSIS, Python, Databricks, Google BigQuery, Snowflake, Amazon Redshift, and Azure SQL Data Warehouse/Synapse** for data extraction, transformation, migration, validation, and troubleshooting.
- Experienced in developing, executing, reviewing, and troubleshooting **SQL scripts and SSIS packages**, maintaining reusable SQL libraries, validating converted datasets, and resolving data discrepancies during customer implementations.
- Proficient in developing **XML parsing and transformation logic**, working with REST APIs and integration workflows, and supporting structured data exchanges between ERP platforms and external enterprise applications.
- Experienced with **data automation, data mining, ETL/ELT, data warehousing, data integration, and Big Data technologies**, including Databricks, BigQuery, Hadoop, Snowflake, Redshift, and Azure Synapse.
- Working knowledge of **Tableau and Power BI** for visually analyzing operational and business data, validating implementation outcomes, identifying data-quality issues, and communicating actionable insights to technical and non-technical stakeholders.
- Strong analytical, troubleshooting, documentation, communication, and project coordination skills with proven ability to work independently in remote Agile environments, manage priorities, support customers, and adapt quickly to changing technologies and implementation requirements.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Data Languages:** SQL, T-SQL, Python, XML, Java, C#, JavaScript, TypeScript, JSON, Bash.
- **Databases & Data Warehousing:** Microsoft SQL Server (MSSQL), Google BigQuery, Databricks, Snowflake, Amazon Redshift, Azure SQL Data Warehouse/Synapse, PostgreSQL, MySQL, Oracle, Hadoop.
- **Data Integration & ETL:** SSIS, ETL/ELT, Data Conversion, Data Migration, Data Integration, Data Validation, Data Mapping, Data Cleansing, Data Mining, XML Parsing, Data Reconciliation, Bulk Data Processing.
- **Cloud & Big Data:** Azure, AWS, Databricks, Google BigQuery, Amazon S3, AWS Lambda, Redshift, Apache Spark, Hadoop, Azure Synapse Analytics, Snowflake.
- **Business Intelligence:** Power BI, Tableau, Data Visualization, Dashboard Development, KPI Analysis, Data Profiling, Operational Reporting, Customer Data Analysis.
- **Enterprise & Integration:** ERP Platforms, Federated SSO, Non-Federated SSO, User Provisioning, Bulk User Setup, REST APIs, Web Services, System Integration, Networking Fundamentals, Application Troubleshooting.
- **Tools & Methodologies:** Git, GitLab, Jenkins, TeamCity, Jira, Azure DevOps, Confluence, Splunk, Agile/Scrum, SDLC, Project Management, Technical Documentation, Customer Support, Root-Cause Analysis.

EXPERIENCE

Software Engineer

Oct 2024 – Present

PCMI LLC (Full Time)

Chicago, IL, USA

- Developed, executed, and maintained complex **MSSQL and T-SQL scripts** to extract, transform, validate, reconcile, and migrate customer, contract, claims, and transactional data during enterprise platform implementation and data-conversion activities.
- Supported end-to-end **data conversion and migration** initiatives by validating source-to-target mappings, performing record-count reconciliation, identifying missing or invalid records, consolidating validation feedback, and communicating discrepancies to implementation teams.
- Developed and troubleshoot **SSIS packages** for automated data extraction, transformation, cleansing, and loading while investigating package failures, SQL errors, data-type mismatches, referential-integrity issues, and performance bottlenecks.
- Created and maintained **XML parsing and transformation logic** to process structured customer and application data, validate XML schemas, extract required elements, and integrate data with enterprise APIs and downstream systems.
- Worked with **Databricks, Snowflake, Amazon Redshift, and Azure-based data platforms** to validate large datasets, execute transformation logic, investigate conversion issues, and support scalable data-integration workflows.
- Assisted technical leads and project managers throughout customer implementations by providing **data validation results, project updates, issue status, user provisioning support, implementation documentation, and technical troubleshooting** across multiple workstreams.
- Supported **federated and non-federated SSO configurations**, including bulk user setup and provisioning, validating user information and access mappings while troubleshooting authentication and application-access problems across integrated environments.
- Investigated customer-reported **data conversion and production issues** using SQL queries, application logs, XML payloads, and Splunk; documented root causes, resolutions, reusable SQL scripts, procedures, and troubleshooting steps within the team's standard technical library.

Environments: MSSQL, T-SQL, SQL Server, SSIS, XML, Python, Databricks, Snowflake, Amazon Redshift, Azure Synapse, REST APIs, ETL/ELT, Data Conversion, Data Validation, SSO, User Provisioning, Power BI, Tableau, Splunk, Git, TeamCity, Jira, Confluence, Agile/Scrum.

Software Engineer

Dec 2023 – Sept 2024

Client: CVS

Remote, USA

- Developed and executed **SQL and T-SQL scripts** against healthcare databases to retrieve, transform, reconcile, and validate member, provider, claims, financial, pharmacy, and operational datasets supporting application integrations and implementation activities.
- Performed detailed **data conversion validation** by comparing source and target datasets, validating field mappings, identifying duplicates and missing records, reconciling totals, and consolidating findings for technical leads and business stakeholders.
- Developed and maintained **SSIS packages and ETL workflows** for moving healthcare data across application and database environments, implementing transformations, error handling, logging, and data-quality validation while troubleshooting failed loads.
- Created **XML and JSON parsing logic** for healthcare system integrations, validating inbound and outbound payloads, extracting required data elements, and troubleshooting formatting, schema, mapping, and interface-related issues.
- Used **Databricks, Google BigQuery, Azure Synapse, Snowflake, and Amazon Redshift** to query and analyze large healthcare datasets and support data warehousing, data integration, reconciliation, and operational reporting requirements.
- Supported healthcare implementation activities involving **user provisioning, SSO, system integration, data validation, access verification, and application troubleshooting**, coordinating with engineering, implementation, customer-support, and project-management teams.
- Built **Power BI and Tableau** reports to visually analyze implementation data, data-quality metrics, operational trends, financial information, and validation results, allowing stakeholders to quickly identify discrepancies requiring remediation.
- Documented **SQL procedures, data mappings, conversion rules, SSIS workflows, validation processes, defects, implementation updates, and troubleshooting resolutions**, while communicating project risks and timeline impacts to geographically distributed teams.

Environments: MSSQL, SQL Server, T-SQL, SSIS, XML, Python, Databricks, Google BigQuery, Azure Synapse, Snowflake, Amazon Redshift, Healthcare Data, ETL, Data Conversion, Data Validation, SSO, REST APIs, Power BI, Tableau, Splunk, GitLab, Jenkins, Jira, Confluence.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Supported enterprise **ERP data integration and conversion** activities using SQL, MSSQL, XML, and ETL processes, validating customer, financial, operational, employee, and transactional data across application modules.
- Developed, executed, and troubleshoot **SQL/T-SQL scripts** involving joins, stored procedures, CTEs, subqueries, temporary tables, aggregations, and data-validation logic to identify and resolve application and data-conversion issues.
- Worked with **SSIS packages** to extract, transform, and load enterprise datasets between source systems and target ERP environments, troubleshooting package failures, connection issues, incorrect mappings, and invalid source data.
- Developed and validated **XML-based interfaces** for exchanging structured information between ERP applications and external systems, including XML parsing, schema validation, element mapping, and error handling.
- Performed **source-to-target data validation and reconciliation**, verifying record counts, financial totals, field-level transformations, reference data, duplicates, null values, and business-rule compliance during application releases and implementations.
- Supported **SSO and user provisioning** activities by validating user profiles, roles, permissions, authentication configurations, and bulk provisioning data while assisting teams with access-related implementation issues.
- Created basic **Power BI and Tableau reports** to analyze ERP data, operational KPIs, conversion status, error trends, and implementation validation results for product, engineering, and business stakeholders.
- Collaborated with technical leads, project managers, developers, support teams, and customers to investigate **ERP data and application issues**, document new processes and procedures, communicate changes, and meet implementation milestones in Agile environments.

Environments: ERP, MSSQL, SQL Server, T-SQL, SSIS, XML, Python, Databricks, ETL, Data Conversion, Data Migration, Data Validation, SSO, User Provisioning, REST APIs, Oracle, MySQL, Power BI, Tableau, Jenkins, Git, Jira, Confluence, Agile/Scrum.

Associate Software Engineer

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and maintained **SQL scripts** to retrieve, update, validate, and reconcile enterprise application data, supporting implementation, system integration, data-conversion, and production-support activities.
- Assisted senior technical team members in reviewing and troubleshooting complex **SQL queries, stored procedures, and SSIS packages**, investigating data-processing failures and validating corrections before deployment.
- Supported **ETL and data-conversion workflows** by validating source files, reviewing data mappings, reconciling source and target records, identifying data-quality issues, and assisting with migration defect resolution.
- Developed **XML code and parsing utilities** to retrieve required elements from structured files, validate XML payloads, and support data exchange between enterprise applications and external services.
- Performed database and application troubleshooting using **SQL, logs, API responses, and network connectivity checks**, helping isolate hardware, configuration, application, and data-related problems reported by users.
- Supported customer and internal service requests by performing **data investigations, SQL script development, data validation, issue reproduction, and root-cause analysis**, escalating complex issues with detailed technical findings when required.
- Worked with cross-functional teams in an **Agile/SDLC environment**, providing implementation updates, documenting meeting outcomes, tracking assigned activities, prioritizing work, and communicating risks that could affect project deadlines.
- Created and maintained technical documentation covering **SQL scripts, data mappings, XML integrations, validation procedures, troubleshooting steps, and implementation processes**, improving reuse of solutions and knowledge transfer across teams.

Environments: SQL, MSSQL, SQL Server, T-SQL, SSIS, XML, Python, ETL, Data Conversion, Data Validation, ERP Applications, REST APIs, Data Integration, MySQL, Oracle, Power BI, Tableau, Git, Jenkins, Jira, Confluence, Agile/SDLC.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
