

Vishal Kumar Allam

Dallas, TX | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Results-driven **Quality Engineer / Test Automation Engineer** with **6+ years of experience** designing test strategies and delivering scalable automation solutions for enterprise, distributed, cloud-native, and microservices-based applications.
- Strong programming expertise in **Java, Spring Boot, JavaScript, TypeScript, SQL, and PL/SQL**, with hands-on experience building automation frameworks for web applications, web services, REST APIs, and backend systems.
- Extensive experience with **Playwright, REST Assured, Karate, Cucumber BDD, Selenium WebDriver, TestNG, JUnit, and API automation**, covering functional, integration, regression, API, database, and end-to-end testing.
- Advanced database validation experience using **Oracle, PostgreSQL, DB2, SQL, and PL/SQL**, including complex query development, stored procedure validation, transaction verification, and backend data reconciliation.
- Experienced validating **distributed and microservices-based applications** across UI, API, service, database, messaging, and cloud layers while troubleshooting complex integration and data consistency issues.
- Hands-on expertise integrating automated test suites into **GitHub, Jenkins, Maven, Docker, SonarQube, and CI/CD pipelines**, supporting continuous testing, static analysis, quality gates, and release readiness.
- Experienced with **AWS, Microsoft Azure, cloud-native and containerized applications, Agile/Scrum, Jira, performance testing, security testing, and cross-functional engineering collaboration** to deliver high-quality enterprise software.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Backend:** Java, Spring Boot, JavaScript, TypeScript, SQL, PL/SQL, RESTful Web Services, Microservices
- **Automation Frameworks:** Playwright, REST Assured, Karate, Cucumber BDD, Selenium WebDriver, TestNG, JUnit, Page Object Model, Data-Driven Framework
- **Testing Expertise:** Functional Testing, Integration Testing, Regression Testing, API Testing, Database Testing, End-to-End Testing, System Testing, Performance Testing, Security Testing
- **Databases:** Oracle, PostgreSQL, DB2, MySQL, SQL Server, Advanced SQL, PL/SQL, Stored Procedures, Data Validation, Query Optimization
- **CI/CD & DevOps:** GitHub, Jenkins, Maven, Docker, SonarQube, GitLab CI/CD, Git, Continuous Integration, Continuous Testing, Quality Gates
- **Cloud & Distributed Systems:** AWS, Microsoft Azure, Cloud-Native Applications, Containerized Applications, Distributed Systems, Microservices Architecture, REST APIs
- **Tools & Methodologies:** Jira, Postman, Swagger/OpenAPI, Confluence, Agile Scrum, Test Strategy, Test Planning, Defect Management, Root Cause Analysis

EXPERIENCE

Test Automation Engineer *PCMI LLC (Full Time)*

Oct 2024 – Present
Dallas, TX, USA

- Designed and executed comprehensive **test strategies** for enterprise SaaS applications, defining coverage for functional, integration, regression, API, database, and end-to-end testing across distributed application layers.
- Developed and maintained scalable automation frameworks using **Java, Spring Boot, Playwright, REST Assured, Karate, Cucumber, and TestNG** for UI, web-service, REST API, and microservices validation.
- Validated distributed and microservices-based applications by testing interactions across user interfaces, REST APIs, Spring Boot services, databases, messaging components, and downstream enterprise integrations.
- Performed advanced backend validation using **Oracle, PostgreSQL, DB2, SQL, and PL/SQL**, developing complex queries to verify transactions, stored procedures, data integrity, business rules, and service-to-database consistency.
- Built reusable API automation utilities using REST Assured and Karate to validate HTTP methods, JSON payloads, status codes, schemas, authentication, error handling, service contracts, and end-to-end business workflows.
- Integrated automated regression suites with **GitHub, Jenkins, Maven, Docker, and SonarQube** CI/CD pipelines, enabling continuous testing, automated quality gates, static code analysis, and rapid feedback during software delivery.
- Validated cloud-native and containerized services deployed on **AWS and Microsoft Azure**, performing API, integration, performance, security, and production-readiness testing across Docker-based environments.
- Collaborated with developers, Product Owners, DevOps engineers, architects, and QA teams in Agile/Scrum ceremonies using Jira to analyze defects, identify root causes, prioritize risks, and ensure high-quality releases.

Environment: Java, Spring Boot, Playwright, REST Assured, Karate, Cucumber BDD, TestNG, REST APIs, Microservices, Oracle, PostgreSQL, DB2, SQL, PL/SQL, GitHub, Jenkins, Maven, Docker, SonarQube, AWS, Azure, Jira, Agile Scrum, Functional Testing, Integration Testing, Regression Testing, API Testing, Database Testing, End-to-End Testing

SDET

Dec 2023 – Sept 2024

Client: CVS

Remote, USA

- Designed and implemented enterprise healthcare test strategies covering **functional, integration, regression, API, database, and end-to-end testing** across distributed web applications and backend services.
- Built and maintained automation frameworks using **Java, Spring Boot, Playwright, REST Assured, Karate, Cucumber BDD, and TestNG** to validate web interfaces, REST APIs, and microservices-based healthcare applications.
- Automated RESTful web-service validation using REST Assured and Karate, covering request/response payloads, schemas, authentication, status codes, negative scenarios, business rules, and service dependencies.
- Performed database validation using **Oracle, PostgreSQL, DB2, advanced SQL, and PL/SQL**, verifying healthcare transactions, data mappings, stored procedures, backend processing, and service-to-database consistency.
- Validated distributed applications across UI, API, microservice, database, and cloud layers, troubleshooting data synchronization, service integration, timeout, error-handling, and transaction-processing issues.
- Integrated automation suites into **GitHub/GitLab, Jenkins, Maven, Docker, and SonarQube** pipelines to support continuous testing, code-quality analysis, automated regression execution, and deployment readiness.
- Performed testing of cloud-native and containerized applications hosted on **AWS and Microsoft Azure**, including performance testing, security validation, API resilience, and Docker-based service verification.
- Partnered with Software Engineers, Product Owners, DevOps, architects, and business stakeholders in Agile/Scrum teams, using Jira for defect management, sprint planning, backlog refinement, root-cause analysis, and release validation.

Environment: Java, Spring Boot, Playwright, REST Assured, Karate, Cucumber BDD, TestNG, JUnit, REST APIs, Microservices, Oracle, PostgreSQL, DB2, SQL, PL/SQL, GitHub, GitLab, Jenkins, Maven, Docker, SonarQube, AWS, Azure, Jira, Agile Scrum, Performance Testing, Security Testing

Software Engineer *Infor*

Sept 2021 – Dec 2022

Hyderabad, India

- Designed and executed automation strategies for enterprise applications, covering functional, integration, regression, API, database, system, and end-to-end testing across web and distributed application environments.
- Developed reusable automation components using **Java, Spring Boot, Selenium WebDriver, Playwright, Cucumber BDD, TestNG, and REST Assured** to improve maintainability and regression coverage.
- Validated REST APIs and microservices using REST Assured, Karate, Postman, and SoapUI, verifying JSON/XML payloads, service contracts, HTTP responses, exception handling, and backend integrations.
- Performed database testing using **Oracle, PostgreSQL, DB2, SQL, and PL/SQL**, validating data integrity, business rules, stored procedures, transaction processing, and backend application behavior.
- Tested distributed application workflows across UI, services, APIs, databases, and external integrations while reproducing complex defects and supporting root-cause analysis with development teams.
- Integrated automated test suites with **Jenkins, Maven, Git, Docker, and SonarQube** to enable continuous testing, build validation, code-quality checks, and repeatable regression execution.
- Supported cloud-native application testing across AWS/Azure environments, validating containerized services, APIs, integrations, scalability, application behavior, and deployment readiness.
- Collaborated with Product Managers, Software Engineers, DevOps teams, and QA stakeholders through Agile/Scrum ceremonies, Jira defect triage, sprint planning, technical reviews, and release-readiness activities.

Environment: Java, Spring Boot, Selenium WebDriver, Playwright, REST Assured, Karate, Cucumber BDD, TestNG, Oracle, PostgreSQL, DB2, SQL, PL/SQL, REST APIs, Microservices, Jenkins, Maven, Git, Docker, SonarQube, AWS, Azure, Jira, Agile Scrum

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed test strategies for enterprise web and service-based applications, covering functional, integration, regression, API, database, system, and end-to-end testing.
- Built Java-based automation solutions using **Selenium WebDriver, Cucumber BDD, TestNG, REST Assured, and Page Object Model** to automate critical business workflows and regression scenarios.
- Performed REST API and web-service testing using REST Assured and Postman, validating HTTP methods, JSON/XML payloads, response codes, service contracts, and backend integration behavior.
- Executed database validation using **Oracle, PostgreSQL, SQL, and PL/SQL**, verifying records, transactions, stored procedures, business rules, and data consistency across application layers.
- Validated distributed enterprise applications across UI, API, services, databases, and external interfaces while investigating integration defects and supporting root-cause analysis.
- Integrated automation suites with **Jenkins, Maven, Git, and CI/CD pipelines** to support automated builds, regression execution, continuous testing, and deployment validation.
- Performed mobile and web application validation using Appium and Selenium while contributing to performance, security, system integration, UAT, and production-readiness testing.
- Worked with Software Engineers, Business Analysts, QA leads, and Product stakeholders within Agile/Scrum teams using Jira for requirement analysis, defect management, sprint planning, and release support.

Environment: Java, Selenium WebDriver, Cucumber BDD, TestNG, REST Assured, Appium, REST APIs, Oracle, PostgreSQL, SQL, PL/SQL, Jenkins, Maven, Git, CI/CD, Jira, Agile Scrum, Functional Testing, Integration Testing, Regression Testing, API Testing, Database Testing, UAT

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
