

Vishal Kumar Allam

Dallas, TX | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Forward Deployed Engineer and software professional with **6+ years of experience** designing, building, and deploying production-grade enterprise solutions using Python, JavaScript/TypeScript, Java, Apex, APIs, cloud data platforms, full-stack architectures, and AI technologies across regulated and customer-facing environments.
- Hands-on experience delivering **agentic AI applications, AI agents, LLM-powered systems, prompt engineering, reasoning workflows, tool calling, RAG, and orchestration patterns** that take real actions through enterprise data, APIs, workflows, and customer systems.
- Experienced owning technical components **end-to-end from architecture selection and rapid POC/MVP development through deployment, validation, observability, KPI measurement, and production operation**, with a strong builder mindset and bias toward shipping working solutions.
- Strong experience with **Salesforce Agentforce, Salesforce Data 360, Python, TypeScript, Node.js, React, Apex, LangChain, LlamaIndex, Snowflake, Databricks, AWS, Azure, REST APIs, microservices, and headless application architectures**.
- Built enterprise data pipelines and integration solutions involving **data modeling, ETL/ELT, customer data platforms, Snowflake, Databricks, Salesforce Data 360, APIs, streaming and batch workflows**, connecting governed data with AI agents and operational applications.
- Worked directly with customers, sales teams, Deployment Strategists, architects, engineers, and product stakeholders to translate **business challenges into deployable agentic solutions**, communicate architecture trade-offs, co-build solutions, and enable customer teams during delivery.
- Applied engineering rigor across **AI output evaluation, agent performance, production observability, dashboards, KPI reporting, security, privacy, responsible AI, identity, CI/CD, deployment patterns, and measurable business outcomes** while continuously experimenting with frontier models and AI-assisted developer tools.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Full-Stack:** Python, JavaScript, TypeScript, Node.js, Java, Apex, FastAPI, Flask, React, REST APIs, Microservices, Full-Stack Development, Backend Engineering, Headless Architectures.
- **Salesforce & Agentic AI:** Salesforce Agentforce, Salesforce Data 360, AI Agents, Agentic Applications, LLMs, Prompt Engineering, Reasoning, Tool Calling, Function Calling, RAG, LangChain, LlamaIndex, Orchestration Patterns, Human-in-the-Loop.
- **AI Development:** OpenAI, Anthropic Claude, Google Gemini, Frontier Models, Cursor, Claude Code, Salesforce Vibes, AI-Assisted Development, Agentic Coding Workflows, Model Evaluation, Prompt Evaluation, Structured Outputs.
- **Data Engineering:** Salesforce Data 360, Snowflake, Databricks, BigQuery, SQL, PySpark, Spark, ETL/ELT, Data Pipelines, Data Modeling, Customer Data Platforms, CDC, Batch Processing, Data Validation.
- **Cloud & Integration:** AWS, Azure, GCP, AWS Lambda, S3, IAM, REST APIs, API Gateways, OAuth2/OIDC, JWT, SAML, RBAC, Event-Driven Architecture, Enterprise Integration, Cloud-Native Deployment.
- **Production Engineering:** Docker, Terraform, Git, Azure DevOps, Jenkins, TeamCity, GitLab CI/CD, GitHub Actions, Observability, Logging, Monitoring, Agent Performance Dashboards, KPI Reporting, Production Validation.
- **FDE / Customer Delivery:** Customer-Facing Technical Delivery, Technical Discovery, Solution Architecture, POCs, MVPs, Co-Building, Public Sector, Higher Education, Nonprofit, Sales Collaboration, Customer Architects, Enablement, Platform Feedback, Production Deployment.

EXPERIENCE

Software Engineer AI *PCMI LLC (Full Time)*

Oct 2024 – Present
Dallas, TX, USA

- Designed and deployed production-grade **agentic AI solutions and customer experiences** using Salesforce Agentforce, Palantir, Python, FastAPI, LLMs, REST APIs, and cloud services, enabling agents to execute real actions across insurance workflows, enterprise data, and operational systems.
- Partnered directly with customers, Deployment Strategists, architects, sales teams, and engineering stakeholders to translate complex business challenges into **agent intelligence, prompts, reasoning workflows, tool calls, integrations, and deployable AI solutions** with measurable operational outcomes.
- Built AI agents using **Agentforce, RAG, LangChain, LlamaIndex, OpenAI, Claude, prompt engineering, semantic retrieval, structured outputs, tool use, and human-in-the-loop patterns**, integrating agents with enterprise APIs, governed data, and customer systems.
- Engineered data pipelines across **Salesforce Data 360, Snowflake, Databricks, Palantir Foundry, PySpark, SQL, APIs, and customer data platforms**, modeling business entities, transforming operational data, and validating outputs consumed by AI agents and applications.
- Owned technical components end-to-end from **architecture selection and POC/MVP development through deployment, validation, observability, and production operation**, balancing security, reliability, latency, model quality, scalability, and business impact.
- Built **agent performance dashboards and customer KPI reporting** to monitor deployment health, task completion, model and tool behavior, latency, usage, operational outcomes, and business value while surfacing edge cases and platform gaps to engineering and product teams.
- Applied **AI-assisted developer workflows using Cursor, Claude, agentic coding tools, CI/CD, Docker, Terraform, logging, and monitoring**, while co-building with customers, sharing implementation best practices, and enabling teams to independently operate and extend delivered solutions.

Environments: Salesforce Agentforce, Salesforce Data 360, Palantir Foundry/AIP, Python, FastAPI, Apex, TypeScript, OpenAI, Claude, LangChain, LlamaIndex, RAG, Snowflake, Databricks, PySpark, SQL, AWS, Azure, REST APIs, Docker, Terraform, Cursor, CI/CD, Observability, KPI Dashboards.

Software Engineer AI *Client: CVS*

Dec 2023 – Sept 2024
Remote, USA

- Designed and delivered production healthcare applications using **Python, TypeScript, Node.js, FastAPI, React, REST APIs, AWS, SQL, and microservices**, supporting secure, scalable customer and operational workflows within a highly regulated enterprise environment.
- Developed **LLM-powered agents, RAG applications, internal copilots, reasoning workflows, prompt strategies, and tool-calling integrations** using OpenAI, Claude, LangChain, LlamaIndex, embeddings, vector retrieval, and enterprise healthcare data.
- Built data and integration services connecting **Snowflake/Databricks-style data platforms, APIs, customer data sources, backend services, and cloud workflows**, applying data modeling, transformation, and reusable integration patterns for AI-enabled applications.
- Engineered cloud-native solutions using **AWS Lambda, S3, IAM, Docker, serverless and event-driven architectures**, integrating models and APIs while addressing identity, privacy, secure data handling, scalability, availability, and deployment requirements.
- Owned application components from **architecture and implementation through CI/CD deployment, structured logging, monitoring, observability, output evaluation, latency analysis, and production support**, ensuring engineering rigor for customer-dependent systems.
- Built operational dashboards and KPI reporting using application telemetry and business data to measure **deployment health, workflow performance, service latency, usage, reliability, and customer outcomes**, using insights to drive iterative product improvements.
- Collaborated with product leaders, customer architects, engineering teams, and business stakeholders through **technical discovery, solution design, POC/MVP development, architecture reviews, enablement, production deployment, and knowledge transfer**.

Environments: Python, TypeScript, Node.js, FastAPI, React, OpenAI, Claude, LangChain, LlamaIndex, RAG, AWS Lambda, S3, IAM, REST APIs, Microservices, SQL, Snowflake/Databricks Concepts, Docker, OAuth2/OIDC, JWT, CI/CD, Observability, KPI Reporting.

Software Engineer *Infor*

Sept 2021 – Dec 2022
Hyderabad, India

- Designed and developed production enterprise applications using **Python, TypeScript, Node.js, FastAPI, Flask, REST APIs, SQL, and microservices**, delivering scalable backend and full-stack capabilities across distributed customer-facing platforms.
- Built reusable services for **workflow orchestration, business-rule execution, data processing, API integration, asynchronous operations, and headless application patterns**, enabling modular communication across enterprise systems.
- Engineered data pipelines using **Python, PySpark, SQL, ETL/ELT, data modeling, PostgreSQL, MySQL, Oracle, and cloud data concepts**, transforming high-volume operational datasets into reliable application and analytical outputs.
- Designed enterprise integration patterns using **REST APIs, JSON, authentication, API contracts, event-driven architectures, reusable clients, and distributed services**, connecting web applications, backend systems, and external platforms.
- Owned software components throughout **technical design, development, deployment, observability, performance optimization, production diagnostics, and ongoing iteration**, applying clean architecture and production-quality coding practices.
- Implemented cloud and DevOps workflows using **Docker, Jenkins, Git, CI/CD, structured logging, environment configuration, and cloud-native deployment patterns**, improving portability, release consistency, and operational visibility.
- Collaborated with customer-facing teams, architects, product managers, and engineers to translate **business requirements into technical designs, POCs, scalable solutions, architecture trade-offs, implementation plans, and production releases**.

Environments: Python, TypeScript, Node.js, FastAPI, Flask, PySpark, REST APIs, Microservices, SQL, PostgreSQL, MySQL, Oracle, ETL/ELT, Data Modeling, Docker, Jenkins, Git, CI/CD, Event-Driven Architecture, Cloud-Native Applications.

Associate Engineer

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed production backend and enterprise applications using **Python, Flask, REST APIs, SQL, microservices, and distributed-system architectures**, supporting complex customer-facing business and operational workflows.
- Built reusable application components for **business logic, workflow execution, data transformation, API communication, document processing, configuration management, and asynchronous operations**, improving scalability and development velocity.
- Designed RESTful integrations connecting **web applications, backend services, relational databases, customer systems, and third-party platforms**, implementing secure API contracts, authentication, structured payloads, and error-handling patterns.
- Engineered data-processing solutions using **Python, SQL, PostgreSQL, MySQL, batch pipelines, scheduled workflows, and data modeling**, supporting large transactional datasets and downstream operational applications.
- Contributed to production architectures using **microservices, event-driven patterns, identity and access controls, headless integration concepts, Git, Docker, CI/CD, Linux, logging, and deployment automation**.
- Worked directly with architects, senior engineers, analysts, and customer-facing teams to convert changing requirements into **technical designs, implementation plans, working software, production deployments, and measurable workflow improvements**.
- Created reusable engineering assets and enabled distributed teams through **shared service components, API patterns, architectural documentation, deployment procedures, production runbooks, technical knowledge transfer, and implementation best practices**.

Environments: Python, Flask, REST APIs, Microservices, SQL, PostgreSQL, MySQL, JSON, Data Modeling, Batch Processing, Event-Driven Architecture, Docker, Git, CI/CD, Linux, Cloud-Native Concepts, API Security, Distributed Systems.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.

- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
