

Vishal Kumar Allam

Dallas, TX | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Results-driven **Product Quality / QA Automation Engineer** with **6+ years of experience** validating product quality, customer-facing applications, SaaS platforms, endpoint software, mobile applications, and enterprise solutions across real-world customer environments.
- Extensive experience designing and executing **pre-launch and post-launch validation**, regression testing, production-readiness assessments, release testing, customer journey validation, and high-impact defect verification throughout the product lifecycle.
- Hands-on expertise validating end-to-end customer journeys including **installation, activation, account creation, trial conversion, subscription management, device setup, authentication, onboarding, and VPN-related workflows**.
- Strong cross-platform testing experience across **Windows, macOS, iOS, Android, Chrome, Firefox, Edge, Safari, OEM environments, virtualized environments, and customer-specific device configurations**.
- Experienced reproducing customer-reported defects, collecting **logs, screenshots, traces, environment details, and detailed reproduction steps**, performing root-cause analysis, validating fixes, and partnering with Engineering to accelerate resolution.
- Strong customer-centric quality mindset with experience identifying **usability issues, customer friction, abandonment points, support-contact drivers, escalation trends, customer sentiment, and product-adoption challenges**.
- Proven ability to collaborate with Product Management, Engineering, Customer Support, Analytics, and Voice of Customer teams while producing **quality scorecards, defect trends, customer-impact analysis, launch-readiness reports, and actionable product recommendations**.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Product Quality Validation:** Pre-Launch Testing, Post-Launch Testing, Production Readiness, Release Testing, Regression Testing, Launch Reviews, Readiness Assessments, Risk Identification
- **Customer Journey Testing:** Installation, Activation, Trial Conversion, Account Creation, Subscription Management, Device Protection Setup, Authentication, VPN Onboarding, Usability Testing
- **Platforms & Environments:** Windows, macOS, iOS, Android, Chrome, Firefox, Edge, Safari, OEM Environments, Virtualized Environments, Real-World Device Testing
- **Defect & Troubleshooting:** Defect Reproduction, Root Cause Analysis, Log Analysis, Screenshots, Reproduction Steps, Fix Validation, Production Issue Triage, Jira, Escalation Management
- **Customer Experience:** Voice of Customer, Customer Friction Analysis, Support Contact Drivers, Customer Sentiment, Escalation Trends, Product Adoption, Customer Impact Analysis
- **Automation & Engineering:** Selenium WebDriver, Playwright, Appium, Java, Python, TypeScript, C#, REST APIs, Postman, SQL, CI/CD, Jenkins, Git
- **Product Domains & Reporting:** Cybersecurity, SaaS, Endpoint Software, Consumer Technology, Quality Scorecards, Executive Reporting, Defect Trends, Launch Readiness, Cross-Functional Collaboration

EXPERIENCE

Test Automation Engineer *PCMI LLC (Full Time)*

Oct 2024 – Present
Dallas, TX, USA

- Led pre-launch and post-launch product validation for customer-facing SaaS applications, creating test plans centered on realistic customer usage scenarios and assessing functionality, usability, reliability, and production readiness before major releases.
- Validated end-to-end customer journeys including **installation/configuration, authentication, account setup, activation, subscription workflows, onboarding, feature enablement, and account-management scenarios** across supported environments.
- Executed cross-platform validation across **Windows, macOS, mobile devices, Chrome, Firefox, Edge, Safari, virtualized environments, and multiple customer configurations**, identifying environment-specific failures and compatibility risks.
- Investigated customer-reported defects from production and support channels by reproducing issues in controlled environments, capturing application logs, screenshots, network traces, test evidence, and detailed reproduction steps for Engineering teams.
- Partnered directly with developers to perform root-cause analysis, isolate application and environment-specific failures, validate candidate fixes, execute targeted regression testing, and verify resolutions before and after production deployment.
- Evaluated customer journeys for usability problems, confusing workflows, abandonment points, unexpected system behavior, and customer friction, providing actionable recommendations to Product and Engineering teams.
- Analyzed defect severity, affected workflows, customer exposure, support impact, and release risk to help prioritize high-impact issues and support launch-readiness decisions.
- Collaborated with Product Management, Engineering, Support, QA, and business stakeholders to review product quality, improve validation coverage, contribute to quality scorecards, and advocate for customer-centric product improvements.

Environment: Windows, macOS, iOS, Android, Chrome, Firefox, Edge, Safari, SaaS, Customer Journey Testing, Installation Testing, Activation Testing, Subscription Testing, Selenium WebDriver, Playwright, Appium, Java, Python, REST APIs, Postman, SQL, Jira, Git, Jenkins, CI/CD, Log Analysis, RCA, Production Validation, Launch Readiness, Agile Scrum

SDET

Dec 2023 – Sept 2024
Remote, USA

Client: CVS

- Performed product-quality validation for large-scale customer-facing healthcare applications across web, mobile, API, and cloud environments, supporting both pre-release validation and post-production quality monitoring.
- Designed customer-focused test scenarios covering **account creation, authentication, enrollment, onboarding, profile management, subscription-like services, notifications, and customer self-service workflows**.
- Validated application functionality across Windows, macOS, iOS, Android, Chrome, Firefox, Edge, Safari, mobile devices, and virtualized test environments to identify compatibility and environment-specific customer issues.
- Reproduced customer and support-reported defects by analyzing Splunk logs, API responses, screenshots, browser/device behavior, SQL records, and application telemetry, documenting clear reproduction steps and business impact in Jira.
- Partnered with Software Engineers and platform teams on defect triage and root-cause analysis, validated code fixes, executed focused regression suites, and verified issue resolution across staging and production-like environments.
- Performed end-to-end usability and customer journey validation to identify confusing workflows, friction points, navigation issues, failure messages, and scenarios that could increase support contacts or reduce product adoption.
- Supported release and launch-readiness activities by analyzing regression results, outstanding defects, customer-impacting risks, platform compatibility, and production-quality indicators before deployment.
- Collaborated with Product Owners, Engineering, QA, Support, and business stakeholders to communicate defect trends, customer impact, release risks, test coverage, and quality recommendations through dashboards and status reporting.

Environment: Windows, macOS, iOS, Android, Chrome, Firefox, Edge, Safari, Customer Experience Testing, Selenium WebDriver, Playwright, Appium, Java, Python, TypeScript, REST Assured, Postman, Splunk, SQL, AWS, Jira, Jenkins, Git, CI/CD, Defect Reproduction, RCA, Regression Testing, Production Validation, Agile Scrum

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Validated customer-facing enterprise applications across web, desktop, and mobile environments, developing test plans and scenarios based on product requirements, customer workflows, usability expectations, and release criteria.
- Performed cross-platform validation across Windows, browsers, Android, iOS, mobile devices, and varying application configurations using Selenium WebDriver, Appium, Java, Playwright, and manual exploratory testing.
- Executed end-to-end customer workflow testing covering authentication, account access, configuration, onboarding, feature usage, navigation, integrations, and application upgrade scenarios to identify customer-facing defects.
- Investigated reported defects by recreating issues across controlled test environments and collecting logs, screenshots, API responses, database records, device details, and reproducible test evidence.
- Worked closely with Software Engineers to isolate root causes, validate defect fixes, perform targeted regression testing, and ensure resolved issues did not negatively affect existing customer workflows.
- Conducted usability and exploratory testing to identify confusing workflows, navigation problems, inconsistent behaviors, compatibility issues, and other sources of customer friction.
- Participated in release-readiness assessments by evaluating regression results, unresolved defects, test coverage, customer-impact risks, and application stability before scheduled deployments.
- Reported quality metrics, defect trends, customer-impact observations, test results, and release risks to Product Managers, Software Engineers, and QA leadership while recommending product-quality improvements.

Environment: Windows, Android, iOS, Web Browsers, Selenium WebDriver, Appium, Playwright, Java, TestNG, Cucumber, Postman, SoapUI, REST APIs, SQL, Jira, TestRail, Jenkins, Git, Regression Testing, Exploratory Testing, Usability Testing, Defect Reproduction, RCA, Release Validation

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Executed product-quality testing for web, mobile, and customer-facing applications across multiple browsers, operating systems, mobile devices, and real-world environment configurations.
- Validated end-to-end customer workflows including application installation, authentication, account access, onboarding, configuration, feature usage, mobile interactions, and application upgrade scenarios.
- Performed cross-platform testing across Windows, Android, iOS, Chrome, Firefox, Edge, mobile devices, and virtualized environments using Selenium WebDriver, Appium, Java, and manual testing techniques.
- Reproduced defects reported during testing and customer-facing validation by collecting screenshots, application logs, environment information, test data, and detailed reproduction steps in Jira.
- Partnered with developers and QA leads to triage issues, investigate root causes, verify fixes, perform regression testing, and confirm product stability before release.
- Conducted exploratory and usability testing to identify customer friction, navigation inconsistencies, confusing messages, compatibility problems, and other defects affecting the overall user experience.
- Supported release validation and production-readiness activities by executing regression suites, reviewing open defects, assessing customer-impacting risks, and validating high-priority fixes.
- Prepared detailed test reports and defect summaries while collaborating with Developers, Business Analysts, Product stakeholders, and QA teams to improve product quality and overall customer experience.

Environment: Windows, Android, iOS, Chrome, Firefox, Edge, Mobile Devices, Virtualized Environments, Selenium WebDriver, Appium, Java, Cucumber BDD, TestNG, REST APIs, Postman, SQL, Jira, Jenkins, Git, Functional Testing, Regression Testing, Exploratory Testing, Usability Testing, Defect Reproduction, RCA, Release Testing

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
