

Vishal Kumar Allam

Dallas, TX | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Results-driven **Software Engineer / Palantir Engineer** with **6+ years of experience** designing, developing, testing, deploying, and supporting enterprise applications, data-driven workflows, integrations, and platform-based solutions across SaaS, healthcare, and product environments.
- Hands-on expertise with **Palantir Foundry**, including Workshop, Ontology, Pipeline Builder, Functions, Actions, Code Repositories, ontology-backed workflows, interfaces, integrations, deployment patterns, security/access management, data lineage, and governance.
- Strong application development experience using **Python, TypeScript, JavaScript, SQL, REST APIs, Git, automated testing, and CI/CD**, with a focus on scalable, maintainable, and production-ready enterprise solutions.
- Experienced designing data models, transformations, pipelines, integrations, and data quality checks connecting enterprise systems, databases, files, APIs, and cloud-based platforms while maintaining data lineage and governance standards.
- Proven ability to translate complex business requirements into practical solution designs, identify technical risks, recommend scalable approaches, define development standards, and deliver high-complexity application components.
- Hands-on experience with **Agentic AI development**, multiple Large Language Models (LLMs), Model Context Protocol (MCP), prompt engineering, tool-enabled agents, and agentic coding frameworks for intelligent enterprise workflows.
- Strong collaboration and client-service skills with experience working with business users, Product Owners, technology teams, vendors, management, and senior leadership to gather requirements, demonstrate functionality, communicate blockers, and deliver solutions within project deadlines.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Palantir Foundry:** Workshop, Ontology, Pipeline Builder, Functions, Actions, Code Repositories, Foundry Applications, Ontology-Backed Workflows, Interfaces, Deployment Patterns
- **Programming & Application Development:** Python, TypeScript, JavaScript, Java, C#, SQL, REST APIs, JSON, XML, Git, Object-Oriented Programming
- **Data & Integration:** Data Modeling, Data Transformations, ETL/ELT Pipelines, Data Quality Checks, Enterprise Integrations, API Integrations, Database Integrations, File-Based Integrations, Schema Design
- **Foundry Governance & Security:** Security/Access Management, Role-Based Access, Data Lineage, Data Governance, Permissions, Operational Standards, Deployment Management
- **Agentic AI & LLMs:** Large Language Models (LLMs), Model Context Protocol (MCP), Agentic Development, Agentic Coding Frameworks, Prompt Engineering, Tool Calling, AI-Assisted Workflows, Multi-Agent Concepts
- **Testing & DevOps:** Unit Testing, Automated Testing, Test Plans, Playwright, Selenium WebDriver, TestNG, JUnit, GitLab CI/CD, Jenkins, TeamCity, GitHub Actions, Docker
- **Solution Delivery & Tools:** Solution Design, Architecture Documentation, Code-Level Documentation, Jira, Confluence, Azure DevOps, Agile Scrum, Technical Estimation, Risk Management, Operational Support

EXPERIENCE

Software Engineer AI *PCMI LLC (Full Time)*

Oct 2024 – Present
Dallas, TX, USA

- Designed and developed enterprise applications and workflow solutions using **Palantir Foundry**, leveraging Workshop, Ontology, Pipeline Builder, Functions, Actions, and Code Repositories to support complex SaaS business processes and operational workflows.
- Built ontology-backed applications and reusable Foundry components using Python, TypeScript, JavaScript, SQL, and REST APIs, translating business requirements into maintainable application designs, data models, workflows, and integrations.
- Designed and maintained scalable data pipelines and transformation logic connecting enterprise databases, APIs, structured files, and application services while implementing data quality checks, schema validation, lineage, and governance controls.
- Developed Palantir Functions and Actions to implement business logic, workflow automation, user interactions, and system integrations, while applying appropriate security/access management, permissions, and deployment patterns.
- Integrated multiple **LLMs and agentic AI capabilities** into enterprise workflows using prompt engineering, MCP, tool-enabled agents, and agentic coding frameworks to automate analysis, decision support, data retrieval, and operational tasks.
- Performed unit testing, automated testing, debugging, performance analysis, and production validation; created test plans, architecture diagrams, code-level documentation, integration specifications, and operational runbooks for ongoing platform support.
- Collaborated with business users, Product Owners, technology teams, vendors, and leadership to gather requirements, explore solution options, demonstrate Foundry functionality, communicate technical risks, blockers, dependencies, and delivery progress.
- Supported production applications by monitoring integrations, configurations, data pipelines, service levels, and performance; resolved operational issues and contributed effort estimates, project tasks, development standards, and continuous platform improvements.

Environment: Palantir Foundry, Workshop, Ontology, Pipeline Builder, Functions, Actions, Code Repositories, Python, TypeScript, JavaScript, SQL, REST APIs, Git, LLMs, MCP, Agentic Development, Data Modeling, Data Transformations, Data Quality, Data Lineage, Governance, Security/Access Management, Automated Testing, CI/CD, Jira, Confluence, Agile Scrum

Software Engineer AI *Client: CVS*

Dec 2023 – Sept 2024
Remote, USA

- Developed enterprise healthcare applications and data-driven workflows using **Palantir Foundry**, including Workshop applications, Ontology objects, Pipeline Builder transformations, Functions, Actions, and reusable integration components.
- Created ontology-backed workflows that modeled healthcare entities, relationships, actions, and operational processes, enabling business users to interact with integrated healthcare data through intuitive Foundry applications.
- Designed Python, TypeScript, JavaScript, and SQL-based data pipelines to ingest, transform, validate, and integrate healthcare data from relational databases, REST APIs, files, and enterprise platforms while enforcing data quality standards.
- Built Functions, Actions, APIs, and integrations connecting Foundry applications with enterprise healthcare services while implementing security/access controls, governance, data lineage, permissions, and reliable deployment patterns.
- Implemented **LLM and agentic AI workflows** using multiple language models, prompt engineering, MCP, tool integrations, and agentic coding frameworks to support intelligent search, summarization, decision support, and automated workflow execution.
- Performed unit testing, automated testing, debugging, and data validation across applications and pipelines; documented architectural decisions, data transformations, code implementations, test plans, and operational support procedures.
- Worked closely with Product Owners, business users, software engineers, platform teams, vendors, and management to translate healthcare requirements into technical designs, demonstrate application functionality, and resolve technical risks and integration challenges.

- Supported CI/CD-based deployment and operational maintenance using Git and automated pipelines, monitored data integrations and application performance, and communicated delivery estimates, blockers, dependencies, service-level issues, and production risks.

Environment: Palantir Foundry, Workshop, Ontology, Pipeline Builder, Functions, Actions, Code Repositories, Python, TypeScript, JavaScript, SQL, REST APIs, Git, LLMs, MCP, Agentic Coding Frameworks, Healthcare Data, Data Modeling, Data Transformations, Data Quality Checks, Security/Access Management, Data Lineage, Governance, Automated Testing, CI/CD, Jira, Agile Scrum

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Developed and maintained enterprise applications, data-driven workflows, and integration services using Python, Java, JavaScript, SQL, REST APIs, and modern software engineering practices.
- Designed data models, transformation logic, and reusable integration components connecting enterprise applications with relational databases, APIs, files, and external systems while ensuring data quality and consistency.
- Built and maintained automated data-processing pipelines supporting ingestion, validation, transformation, and downstream application workflows across enterprise product environments.
- Translated functional and business requirements into practical application designs, identified technical risks and dependencies, and collaborated with Product Managers and engineering teams to recommend scalable implementation approaches.
- Developed reusable backend functions and service components, performed unit and integration testing, debugged application issues, and maintained code through Git-based version-control workflows.
- Created technical artifacts including application design documentation, integration specifications, API documentation, test plans, implementation notes, and operational support procedures.
- Integrated automated tests with Jenkins-based CI/CD pipelines to improve build reliability, detect application defects early, and support repeatable deployments across development environments.
- Collaborated with business stakeholders, Software Engineers, QA teams, and leadership during Agile delivery cycles, communicating project status, blockers, risks, dependencies, estimates, and production support requirements.

Environment: Python, Java, JavaScript, SQL, REST APIs, Data Modeling, Data Transformations, Data Pipelines, Enterprise Integrations, Data Quality Checks, Git, Jenkins, CI/CD, Unit Testing, Automated Testing, Jira, Confluence, Agile Scrum

Associate Software Engineer

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and supported enterprise application components and workflow solutions using Java, JavaScript, SQL, REST APIs, and reusable software development patterns across multi-tier applications.
- Designed and maintained application integrations connecting user-facing applications, backend services, enterprise databases, APIs, and external systems while validating data consistency and interface behavior.
- Developed reusable automation and backend validation components using Java, Selenium WebDriver, Cucumber BDD, TestNG, SQL, and API-based integration testing techniques.
- Supported data transformation, mapping, validation, and database integration activities by executing SQL queries and verifying structured application data across enterprise workflows.
- Performed unit, functional, integration, regression, and system testing; debugged application defects and contributed detailed technical information supporting root-cause analysis and defect resolution.
- Participated in Git and CI/CD-based software delivery processes using Jenkins and Maven, supporting automated builds, application validation, configuration management, and repeatable deployments.
- Prepared technical documentation, test plans, integration results, application support notes, defect analysis, and release documentation to support maintainability and operational readiness.
- Collaborated with business analysts, Software Engineers, QA leads, Product stakeholders, and management to understand requirements, estimate work, communicate technical risks and blockers, and deliver functionality within Agile sprint timelines.

Environment: Java, JavaScript, SQL, REST APIs, Enterprise Applications, Data Integrations, Data Transformation, Data Validation, Selenium WebDriver, Cucumber BDD, TestNG, Git, Jenkins, Maven, CI/CD, Jira, Agile Scrum

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
