

Vishal Kumar Allam

New York, NY | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Quality Assurance Engineer with over **6+ years** of experience delivering structured manual, exploratory, integration, data, API, and automated testing across enterprise web applications, workflow platforms, and business-critical systems.
- Strong hands-on automation experience with **Playwright, TypeScript, Python, Selenium WebDriver, pytest, Cucumber BDD, REST APIs, and SQL**, building maintainable regression and end-to-end coverage across multiple integrated applications.
- Experienced designing test cases from **user stories, acceptance criteria, process flows, data dictionaries, integration specifications, and business scenarios**, with strong focus on risk-based coverage and early defect prevention.
- Proficient in validating **case-management journeys, role-based access, permissions, entitlements, field visibility, routing paths, exception conditions, data security, auditability, and operational controls**.
- Strong API and data-testing background using **Postman, REST/JSON services, SQL, Snowflake concepts, ETL/data pipelines, reconciliation, and middleware integrations**, ensuring backend processing and cross-system consistency.
- Experienced with Agile/Scrum delivery, Jira defect management, UAT preparation, release-readiness reviews, test-data setup, environment validation, smoke testing, CI/CD quality gates, and production-support validation.
- Collaborative Quality Engineer experienced working with Product, Engineering, Business Analysts, business users, vendors, and distributed teams across US, UK/EU, and India while mentoring peers and improving resilient cross-platform QA practices.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Automation:** TypeScript, Python, JavaScript, C#, Java, SQL, Playwright, Selenium WebDriver, pytest, Cucumber BDD, pytest-bdd, Playwright-BDD, NUnit, TestNG.
- **Testing Practices:** Manual Testing, Exploratory Testing, Functional Testing, Regression Testing, Integration Testing, End-to-End Testing, UAT Readiness, Smoke Testing, Risk-Based Testing, Cross-Browser Testing.
- **Enterprise Workflow Testing:** Case Management, User Roles, Routing, Queue Management, Exception Paths, RBAC, Permissions, Entitlements, Field Visibility, Data Security, Auditability, Operational Controls.
- **API & Data Validation:** Postman, Swagger/OpenAPI, REST/JSON APIs, SQL Server, PostgreSQL, Snowflake, Data Reconciliation, ETL/Data Pipelines, Jitterbit Concepts, Backend Processing, Cross-System Validation.
- **Financial & CRM Platforms:** Financial Services, Private Markets, Investor Servicing, Wealth Management, KYC/AML, Investor Onboarding, Subscription Workflows, Salesforce Service Cloud, Sales Cloud, Email-to-Case.
- **DevOps & Test Management:** Jira, Azure DevOps, Azure Pipelines, Azure Test Plans, Git, GitHub, GitLab, Jenkins, CI/CD Pipelines, Quality Gates, Defect Triage, Release Readiness, Test Evidence.
- **Quality Engineering:** Test Strategy, Traceability, Test Data Management, Environment Validation, Performance Testing, Accessibility Testing, Security Testing, Defect Prevention, Root Cause Analysis, QA Reporting, Continuous Improvement.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

New York, NY, USA

- Own structured QA coverage for enterprise workflow features by translating **user stories, acceptance criteria, business process flows, data rules, and integration requirements** into manual, exploratory, regression, integration, and end-to-end test scenarios.
- Develop and maintain automated regression suites using **Playwright, TypeScript/C#, Selenium WebDriver, REST APIs, and SQL**, focusing on reusable test architecture, critical business journeys, negative paths, and cross-system validation.
- Validate role-based workflows including permissions, entitlements, field-level visibility, routing logic, exception handling, data security, and audit trails to ensure correct behavior across different user personas and operational scenarios.
- Perform API and backend validation using **Postman, REST/JSON payloads, SQL Server, and reconciliation queries**, confirming request/response contracts, processing logic, data transformations, and consistency between integrated systems.
- Manage defects through Jira/Azure DevOps with clear reproduction steps, priority, technical evidence, and business impact while partnering with developers to validate fixes, assess regression risk, and prevent recurrence.
- Integrate high-value automated tests into **Azure DevOps/TeamCity CI/CD pipelines**, supporting smoke testing, environment validation, repeatable execution, quality gates, UAT readiness, and release-confidence reporting.
- Collaborate with Product Owners, Business Analysts, developers, and QA peers during requirement walkthroughs, backlog refinement, sprint planning, demos, defect triage, and release reviews while continuously improving regression efficiency and QA standards.

Environments: Playwright, TypeScript, C#, Selenium WebDriver, REST APIs, Postman, SQL Server, Azure DevOps, Azure Test Plans, TeamCity, Git, CI/CD, RBAC, Workflow Testing, Data Reconciliation, Exploratory Testing, UAT Readiness, Jira, Agile/Scrum.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

New York, NY, USA

- Designed and executed structured manual and automated testing across complex web, API, workflow, and data-driven applications, covering functional, exploratory, regression, integration, end-to-end, and UAT-readiness scenarios.
- Built maintainable automation using **TypeScript, Playwright, Selenium WebDriver, RESTAssured, Python, and SQL**, strengthening regression coverage across customer-facing workflows, service integrations, and backend business processes.
- Validated role-based application behavior, user permissions, workflow routing, field-level access, exception conditions, and sensitive-data handling while ensuring operational controls and business rules were consistently enforced.
- Performed REST API and backend validation using **Postman, Swagger/OpenAPI, JSON, SQL, and reconciliation techniques**, confirming interface contracts, downstream processing, data transformations, and cross-system consistency.
- Managed defects through Jira/TestRail by documenting clear evidence, prioritizing business impact, coordinating defect triage, validating fixes, and executing focused regression to protect critical workflows before release.
- Integrated automated regression with **Jenkins, GitLab/GitHub, Git, and CI/CD pipelines**, supporting development, test, UAT, demo, and production-like environments with repeatable smoke and release-validation execution.
- Worked with Product Managers, developers, analysts, business stakeholders, and distributed engineering teams to identify requirement gaps, improve testability, prepare test data, coordinate release activities, and communicate quality risks.

Environments: TypeScript, Python, Playwright, Selenium WebDriver, RESTAssured, Postman, Swagger/OpenAPI, SQL, Jira, TestRail, Jenkins, GitLab/GitHub, Git, CI/CD, Workflow Testing, RBAC, Data Validation, UAT, Distributed Teams, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Created comprehensive test coverage from requirements, process flows, acceptance criteria, integration specifications, and data mappings for enterprise workflow applications spanning multiple user roles and interconnected business processes.

- Developed automated regression and integration suites using **Java, Python, Selenium WebDriver, Cucumber BDD, pytest-style utilities, JUnit, TestNG, REST APIs, and SQL** across complex enterprise applications.
- Validated workflow routing, queue assignments, permissions, business rules, exception processing, user-role behavior, and audit-related data changes while ensuring reliable execution across interconnected application modules.
- Performed API and backend testing using **Postman, SoapUI, REST/SOAP services, JSON/XML, SQL, and reconciliation checks**, verifying service integrations, transformation logic, database processing, and data consistency.
- Supported ETL and middleware validation through source-to-target reconciliation, transformation testing, batch processing checks, and Jitterbit/Informatica-style integration concepts across enterprise data workflows.
- Integrated automated suites with **Jenkins, Git, Maven, and CI/CD pipelines**, enabling continuous regression, repeatable smoke testing, build validation, environment checks, and improved release-readiness feedback.
- Participated in Agile ceremonies, defect triage, release reviews, and cross-team planning while maintaining Jira/qTest evidence, communicating dependencies and risks, and improving standardized QA processes across workstreams.

Environments: Java, Python, Selenium WebDriver, Cucumber BDD, pytest, JUnit, TestNG, Postman, SoapUI, REST APIs, SQL, ETL/Data Validation, Jitterbit/Informatica Concepts, Jenkins, Git, Maven, Jira, qTest, CI/CD, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Designed and executed detailed manual, functional, exploratory, regression, integration, and end-to-end test cases based on user requirements, acceptance criteria, business workflows, and system integration specifications.
- Developed reusable automated regression tests using **Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL**, increasing repeatable coverage across web applications and integrated enterprise services.
- Validated multiple user roles, access permissions, routing scenarios, exception conditions, field-level behavior, and sensitive-data handling to ensure workflows aligned with business rules and operational controls.
- Performed API and backend validation using **Postman, SoapUI, REST/SOAP services, JSON/XML, and SQL queries**, verifying interface behavior, database updates, downstream processing, and cross-system data accuracy.
- Logged and managed defects through Jira with detailed reproduction steps, screenshots, logs, severity, and business impact while collaborating with developers to validate fixes and execute targeted regression testing.
- Integrated automated suites with **Jenkins, Git, and CI/CD pipelines**, supporting development/test environment validation, scheduled regression, smoke testing, build-quality feedback, and release-readiness activities.
- Collaborated with developers, analysts, business users, QA peers, and distributed teams during requirements reviews, Scrum ceremonies, defect triage, and release preparation while supporting knowledge sharing and cross-platform QA coverage.

Environments: Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, SoapUI, REST/SOAP APIs, SQL, Jenkins, Git, Jira, CI/CD, Manual/Exploratory Testing, Workflow Testing, RBAC, Data Validation, UAT Preparation, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
