

Vishal Kumar Allam

New Jersey, NJ | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Quality Assurance and Test Automation Engineer with over **6+ years** of experience validating client-facing digital applications across web, mobile, API, database, and integrated enterprise platforms in fast-paced Agile environments.
- Strong hands-on automation expertise using **Playwright, TypeScript, JavaScript, Selenium WebDriver, C#, REST APIs, SQL, NUnit, and reusable automation frameworks**, developing reliable functional and regression coverage.
- Experienced developing, executing, maintaining, and troubleshooting automated tests across **web-based applications, native/mobile workflows, APIs, backend services, and complex client journeys**, with strong emphasis on test reliability and maintainability.
- Proficient in API and service-layer testing using **Postman, ReadyAPI/SoapUI, Bruno, REST, GraphQL, SOAP, JSON, and SQL**, validating contracts, calculations, business rules, data transformations, and integrated-system behavior.
- Strong database-testing experience with **SQL Server, MySQL, PostgreSQL, complex SQL queries, joins, reconciliation, and data-integrity validation**, ensuring accurate frontend-to-backend processing and system integrations.
- Experienced integrating automated regression suites with **GitHub, Git, Jenkins, Azure DevOps, TeamCity, and CI/CD pipelines**, supporting repeatable execution, source-control standards, faster feedback, and release-readiness validation.
- Collaborative and analytical Quality Engineer experienced partnering with Developers, Solutions Engineers, QA Engineers, Product stakeholders, and business teams to clarify requirements, identify coverage gaps, troubleshoot failures, and deliver high-quality digital solutions.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Automation:** TypeScript, JavaScript, C#, Python, Java, Groovy, SQL, Playwright, Selenium WebDriver, NUnit, XUnit, TestNG, Cucumber BDD.
- **Web, Mobile & API Testing:** Web Application Testing, Mobile Testing, API Automation, UI Automation, Functional Testing, Regression Testing, Integration Testing, End-to-End Testing, Exploratory Testing.
- **API & Service Technologies:** Postman, ReadyAPI, SoapUI, Bruno, REST APIs, GraphQL, SOAP Services, Swagger/OpenAPI, JSON, XML, Request/Response Validation, Contract Testing.
- **Database & Data Validation:** SQL Server, MySQL, PostgreSQL, SQL Queries, Multi-Table Joins, Backend Validation, Calculation Testing, Data Integrity, Reconciliation, Cross-System Data Verification.
- **Performance & Reliability:** JMeter, Performance Testing, Load Testing, Response-Time Validation, Test Failure Analysis, Environment Troubleshooting, Test Data Validation, Root Cause Analysis, Regression Stability.
- **DevOps & Source Control:** GitHub, Git, GitLab, Jenkins, Azure DevOps, TeamCity, CI/CD Pipelines, Automated Regression, Branching/Pull Requests, Coding Standards, Release Readiness.
- **Quality Engineering Practices:** SDLC, Agile/Scrum, Test Design, User Story Analysis, Risk-Based Testing, Reusable Automation Components, Test Coverage, Defect Management, Client Workflows, Private Wealth/Financial Applications.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

New Jersey, NJ, USA

- Develop and maintain automated testing solutions using **Playwright, TypeScript/C#, Selenium WebDriver, REST APIs, and SQL**, supporting client-facing web applications, backend services, integrations, and critical digital workflows.
- Analyze user stories, functional requirements, acceptance criteria, and business scenarios to identify comprehensive test coverage, automation opportunities, edge cases, and gaps before implementation reaches release validation.
- Perform API and service-layer testing using **Postman, ReadyAPI/SoapUI, REST/JSON services, and SQL**, validating request/response behavior, business calculations, integration logic, error handling, and downstream data consistency.
- Design and troubleshoot SQL queries across relational data sets to verify backend processing, financial-style calculations, transaction accuracy, application state changes, and consistency between frontend and integrated systems.
- Build reusable automation components and maintain critical regression coverage while following coding, framework, and source-control standards through Git-based workflows, pull requests, and structured automation reviews.
- Investigate failed automated executions using application logs, API responses, SQL results, test data, environment configuration, screenshots, and debugging evidence to distinguish application, data, environment, and framework issues.
- Collaborate with Developers, Product Owners, Solutions/Business Analysts, and QA engineers to clarify requirements, validate fixes, perform functional/regression testing, and provide reliable quality input for production release readiness.

Environments: Playwright, TypeScript, C#, Selenium WebDriver, NUnit, REST APIs, Postman, ReadyAPI/SoapUI, SQL Server, Azure DevOps, TeamCity, Git, CI/CD, JMeter, API/UI Automation, Database Testing, Regression Testing, Agile/Scrum.

SDET / QA Automation Engineer

Client: CVS

Dec 2023 – Sept 2024

New Jersey, NJ, USA

- Developed and executed automated tests across healthcare client-facing web, mobile, API, and backend applications using **TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, and SQL**.
- Translated requirements and user stories into functional, integration, regression, and business-scenario coverage while identifying opportunities to automate high-value workflows and reduce repetitive manual validation.
- Performed API testing using **Postman, ReadyAPI/SoapUI, Swagger/OpenAPI, REST/JSON, and GraphQL/SOAP concepts**, validating contracts, authentication, response payloads, error handling, and downstream service integrations.
- Created SQL queries and reconciliation checks to validate transaction processing, calculations, backend records, and cross-system data consistency across integrated healthcare and client-service applications.
- Integrated automated suites with **Jenkins, GitLab/GitHub, Git, and CI/CD pipelines**, maintaining reliable regression coverage and providing fast feedback on application changes before release.
- Investigated automation failures using Splunk, browser traces, logs, API responses, SQL, and environment diagnostics to isolate application defects, unstable test data, environment issues, and automation problems.
- Worked closely with developers, SDETs, Product stakeholders, and distributed teams to clarify requirements, prioritize defects, validate fixes, maintain reusable test components, and ensure high-quality release outcomes.

Environments: TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, Postman, ReadyAPI/SoapUI, Swagger/OpenAPI, REST/GraphQL/SOAP, SQL, Jenkins, GitHub/GitLab, Git, Splunk, CI/CD, Web/Mobile/API Testing, Agile/Scrum.

Software Engineer

Infor

Sept 2021 – Dec 2022

Hyderabad, India

- Developed maintainable automated testing solutions using **Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise web, API, and database-driven applications.
- Reviewed user stories, functional specifications, and business requirements to create detailed functional and regression scenarios while identifying missing coverage, integration dependencies, and automation opportunities.
- Performed service-layer validation using **Postman, SoapUI/ReadyAPI, REST/SOAP services, JSON, XML, and SQL**, verifying request-response behavior, backend processing, calculations, and system integrations.

- Designed SQL queries to validate application data, transformations, relational dependencies, business rules, and cross-system consistency while troubleshooting discrepancies between UI results and backend records.
- Created reusable framework components, test-data utilities, and automated regression scenarios while following established coding and source-control practices through Git, Maven, and peer-review workflows.
- Integrated automated suites with **Jenkins, Git, Maven, and CI/CD pipelines**, enabling continuous execution, build validation, regression feedback, and dependable release-quality checks across iterative delivery cycles.
- Collaborated with developers, analysts, QA engineers, and product stakeholders to diagnose failures, validate defect fixes, improve framework maintainability, and continuously strengthen test coverage and engineering quality.

Environments: Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, ReadyAPI/SoapUI, REST/SOAP APIs, SQL, Jenkins, Git, Maven, CI/CD, Database Testing, Regression Automation, Root Cause Analysis, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed manual and automated tests across web, mobile, API, and backend applications using **Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, and SQL**.
- Analyzed functional requirements and user stories to create structured test scenarios covering positive, negative, integration, regression, end-to-end, and business-critical workflows throughout the software development lifecycle.
- Performed REST and SOAP API validation using **Postman, SoapUI, JSON/XML payloads, and SQL queries**, ensuring service responses, business logic, error conditions, and downstream data processing met expected behavior.
- Used SQL and database validation to verify application transactions, calculations, data integrity, cross-table relationships, and synchronization between user-facing workflows and backend systems.
- Built reusable Selenium/Cucumber automation components and maintained regression suites while following coding conventions, Git source-control practices, and framework standards for reliable and maintainable automated tests.
- Investigated failed tests using logs, screenshots, API responses, SQL records, test data, and environment checks while partnering with developers to identify root causes and validate corrective changes.
- Participated in Agile/Scrum ceremonies, defect triage, functional testing, regression cycles, and release validation while communicating testing progress, risks, and unresolved quality concerns to project stakeholders.

Environments: Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, Postman, SoapUI, REST/SOAP APIs, SQL, Jenkins, Git, Jira, CI/CD, Web/Mobile/API Testing, Database Validation, Regression Testing, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
