

Vishal Kumar Allam

Atlanta, GA | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Senior Quality Engineering professional with over **6+ years** of experience delivering stable, scalable, and reliable test automation across digital web, mobile, API, backend, and enterprise applications throughout the software development lifecycle.
- Strong hands-on expertise with **JavaScript, Java, Selenium WebDriver, Appium, Playwright, REST APIs, SQL, JUnit, TestNG, and Cucumber BDD**, developing high-quality functional, integration, regression, UI/API, and end-to-end automated test suites.
- Experienced driving **test design, implementation, coverage decisions, regression strategy, and release sign-off**, balancing unit, functional, integration, end-to-end, performance, security, load, and user-journey testing based on product risk.
- Strong mobile automation experience using **Appium** across Android and iOS, validating digital product workflows, backend-service integrations, device-specific behavior, and cross-platform regression scenarios.
- Experienced integrating automated testing with **Jenkins, GitHub Actions, GitHub, SVN, and CI/CD pipelines**, reviewing automated test runs, triaging failures, improving coverage, and providing rapid quality feedback for production releases.
- Proficient in black-box testing and defect investigation using **network monitoring, debug logs, API traces, performance dashboards, test results, and backend diagnostics**, enabling developers to quickly reproduce and resolve complex issues.
- Quality Engineering leader experienced influencing testing methodologies, mentoring engineers, coordinating regression and release testing, collaborating across distributed teams, and evaluating emerging practices including **AI-assisted and AI-driven testing**.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Automation:** JavaScript, Java, TypeScript, C#, Python, SQL, Selenium WebDriver, Appium, Playwright, JUnit, TestNG, NUnit, Cucumber BDD.
- **Web, Mobile & API Testing:** UI Automation, REST API Testing, Android, iOS, Mobile Automation, Web Applications, Backend Services, Postman, RESTAssured, Swagger/OpenAPI, JSON.
- **Testing Methodologies:** Unit Testing, Functional Testing, Integration Testing, End-to-End Testing, User Journey Testing, Regression Testing, Security Testing, Performance Testing, Load Testing, Black-Box Testing.
- **Test Design & Management:** Test Cases, Test Data, Test Runs, Test Results, Coverage Analysis, Test Inventories, Risk-Based Testing, Release Sign-Off, Jira, TestRail, QMetry, Defect Management.
- **CI/CD & Source Control:** Jenkins, GitHub Actions, GitHub, Git, SVN, Azure DevOps, CI/CD Pipelines, Parallel Execution, Automated Quality Gates, Build Validation, Release Testing.
- **Debugging & Quality Analysis:** Network Monitoring, Debug Logs, Browser DevTools, API Tracing, Performance Dashboards, Failure Triage, Root Cause Analysis, Test Reporting, Release Readiness, Quality Metrics.
- **Quality Engineering Practices:** Shift-Left Testing, Digital Product Testing, Test Automation Strategy, Code Reviews, Distributed Teams, Agile/Scrum, AI-Assisted Testing, Emerging QA Tools, Continuous Improvement.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

Atlanta, GA, USA

- Drive test design and implementation for complex feature enhancements by reviewing user stories, acceptance criteria, and technical requirements and defining appropriate **functional, integration, regression, UI/API, and end-to-end coverage**.
- Develop and maintain stable automation suites using **JavaScript/TypeScript, C#, Selenium WebDriver, Playwright, REST APIs, and SQL**, extending reusable frameworks and improving automated coverage across enterprise web and backend applications.
- Make risk-based coverage decisions across unit-supporting, integration, end-to-end, and user-journey layers while maintaining streamlined test inventories that maximize business coverage without unnecessary duplication.
- Execute black-box validation and troubleshoot failures using **network traces, browser diagnostics, API responses, application logs, SQL data, and performance dashboards**, providing developers with actionable technical evidence for resolution.
- Integrate automated suites with **Azure DevOps/TeamCity, GitHub-style CI/CD pipelines, and Git**, review execution results, triage failures, validate fixes, and coordinate regression and release testing before production deployment.
- Maintain clear test documentation covering new features, test data, execution results, defects, risks, and release recommendations while communicating severity and business impact to developers, Product Owners, and adjacent teams.
- Influence automation and quality practices through code reviews, test-strategy discussions, peer mentoring, shift-left initiatives, and evaluation of emerging testing capabilities including AI-assisted test generation and failure analysis.

Environments: JavaScript/TypeScript, C#, Selenium WebDriver, Playwright, REST APIs, Postman, SQL Server, Azure DevOps, TeamCity, Git/GitHub, CI/CD, Jira, QMetry Concepts, Black-Box Testing, Network/Log Analysis, Regression/Release Testing, AI-Assisted QA, Agile/Scrum.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

Atlanta, GA, USA

- Developed and executed automated UI, mobile, API, integration, and regression testing using **Java, JavaScript/TypeScript, Selenium WebDriver, Appium, Playwright, RESTAssured, and SQL** across healthcare digital products.
- Built mobile regression coverage with **Appium** across Android and iOS workflows, validating complex user journeys, platform-specific behavior, backend-service dependencies, and integrated digital experiences.
- Reviewed feature requirements and technical designs to determine test scope across functional, integration, end-to-end, performance, security, and release testing while identifying high-risk gaps requiring additional automation.
- Used black-box techniques, Splunk, network traces, API logs, SQL queries, device evidence, and performance metrics to investigate failures, distinguish product defects from test issues, and provide detailed debugging information.
- Integrated automation with **Jenkins, GitHub/GitLab, Git, and CI/CD pipelines**, analyzing automated test-run results, triaging failures, verifying fixes, and continuously increasing stable regression coverage.
- Managed test cases and defects using Jira/TestRail-style workflows, maintaining test data, execution results, traceability, defect severity, and release-readiness evidence for stakeholders across distributed teams.
- Collaborated with developers, Product Managers, QA peers, and DevOps teams across multiple locations to improve test methodology, mentor engineers, coordinate release validation, and strengthen shared ownership of product quality.

Environments: Java, JavaScript/TypeScript, Selenium WebDriver, Appium, Playwright, RESTAssured, Postman, Android/iOS, SQL, Jenkins, GitHub/GitLab, Git, CI/CD, Jira, TestRail, Splunk, Performance Dashboards, Mobile/API Testing, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Designed and implemented functional, integration, regression, UI/API, and end-to-end automation using **Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL**.
- Extended reusable automation frameworks with page objects, service helpers, common utilities, and data-driven components while maintaining stable test cases that provided consistent feedback across enterprise digital applications.

- Created test designs from user stories and technical specifications while optimizing test-case inventories to maximize coverage across unit-supporting, integration, end-to-end, and business-critical user journeys.
- Performed black-box validation using application logs, browser/network tools, API responses, database queries, and backend diagnostics to verify acceptance criteria and provide detailed troubleshooting evidence to developers.
- Integrated automated regression suites with **Jenkins, Git, Maven, and CI/CD pipelines**, reviewing execution results, investigating failures, and improving reliability of automated testing across repeated software releases.
- Executed API, performance, and load validation using Postman, REST services, SQL, and JMeter while documenting defects, performance issues, severity, and technical impact for development and product stakeholders.
- Participated in Agile ceremonies, test reviews, code reviews, regression coordination, and process-improvement discussions while sharing automation knowledge and contributing to stronger shift-left Quality Engineering practices.

Environments: Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, Postman, REST APIs, SQL, JMeter, Jenkins, Git, Maven, CI/CD, Black-Box Testing, Test Coverage Analysis, Regression/Release Testing, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed manual and automated testing across digital web, mobile, API, and backend applications using **Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, and SQL**.
- Created functional, integration, regression, end-to-end, and user-journey test cases while maintaining reusable test data and organizing regression inventories to achieve broad coverage with efficient execution.
- Performed Android and iOS mobile automation using Appium, validating user interactions, navigation flows, device-specific behavior, backend integrations, and cross-platform functionality across application releases.
- Executed API and black-box testing using Postman, REST/SOAP services, JSON/XML, browser/network diagnostics, and SQL queries to validate system behavior, integrations, and acceptance criteria.
- Integrated automated suites with **Jenkins, Git/SVN, and CI/CD pipelines**, reviewing test-run results, triaging failures, verifying fixes, and supporting regression and release-testing coordination.
- Tracked defects through Jira with clear reproduction steps, severity, expected versus actual behavior, and supporting technical evidence while collaborating with developers to resolve high-impact application issues.
- Worked with QA, development, and business teams during Agile ceremonies and release activities while contributing to test documentation, automation improvements, knowledge sharing, and continuous improvement of testing practices.

Environments: Java, JavaScript, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, Android/iOS, Postman, REST/SOAP APIs, SQL, Jenkins, Git/SVN, Jira, CI/CD, Functional/Integration/E2E Testing, Regression Testing, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
