

Vishal Kumar Allam

Chicago, IL | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Senior Quality Engineering professional with over **7+ years** of experience designing, developing, and evolving scalable automation frameworks for enterprise SaaS, cloud-based, healthcare, financial, and data-intensive applications.
- Strong hands-on expertise with **Playwright, TypeScript, JavaScript, Selenium WebDriver, REST APIs, Postman, and SQL**, developing reliable UI, API, integration, end-to-end, and regression automation solutions.
- Experienced architecting automation frameworks rather than only consuming existing solutions, including reusable **utilities, helpers, fixtures, page objects, API clients, test-data components, and reporting capabilities**.
- Strong software engineering fundamentals with **Object-Oriented Programming, SOLID principles, design patterns, clean code, framework architecture, debugging, and code reviews**, supporting maintainable and extensible automation systems.
- Hands-on experience modernizing automation by transitioning appropriate Selenium coverage toward **Playwright and TypeScript**, improving test reliability, execution speed, maintainability, and overall regression efficiency.
- Experienced integrating automated testing with **Azure DevOps, Jenkins, Git, CI/CD pipelines, Azure, and AWS**, providing continuous quality feedback, release-readiness signals, and earlier risk identification throughout the SDLC.
- Quality Engineering leader experienced mentoring QA engineers, partnering with Software Engineers on testing architecture, communicating quality metrics and risks, and driving continuous improvement across Agile product teams.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Engineering:** TypeScript, JavaScript, C#, Java, Python, SQL, Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Clean Code, Framework Architecture.
- **Automation Frameworks:** Playwright, Selenium WebDriver, Cypress, NUnit, XUnit, JUnit, TestNG, Cucumber BDD, RESTAssured, Page Object Model, Fixtures, Reusable Utilities, Data-Driven Frameworks.
- **Testing:** UI Automation, API Automation, REST API Testing, Integration Testing, Regression Testing, Functional Testing, End-to-End Testing, Smoke Testing, Exploratory Testing, Release Validation.
- **API & Data Validation:** Postman, Swagger/OpenAPI, REST/JSON APIs, SQL Server, PostgreSQL, MySQL, SQL Queries, Backend Validation, Data Reconciliation, Data Integrity, Cross-System Validation.
- **DevOps & CI/CD:** Azure DevOps, Jenkins, Git, GitHub, GitLab, GitHub Actions, CI/CD Pipelines, Automated Quality Gates, Parallel Test Execution, Continuous Testing, Build and Release Validation.
- **Cloud & Enterprise Platforms:** Microsoft Azure, AWS, SaaS Applications, Cloud-Based Systems, Enterprise-Scale Applications, Retirement & Wealth Workflows, Financial Transactions, Distributed Integrations.
- **Quality Engineering Leadership:** Automation Strategy, Selenium-to-Playwright Migration, Code Reviews, Framework Design, Test Reliability, Quality Metrics, Risk Analysis, Agile/Scrum, Mentoring, Release Readiness, Continuous Improvement.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

Chicago, IL, USA

- Design and enhance scalable automation frameworks using **Playwright, TypeScript/C#, Selenium WebDriver, NUnit, REST APIs, and SQL**, supporting reliable UI, API, integration, and regression validation across enterprise SaaS applications.
- Develop reusable framework components including page objects, fixtures, API helpers, data utilities, common assertions, and configuration abstractions while applying **OOP, SOLID principles, design patterns, and clean-code practices**.
- Support modernization from Selenium-based automation toward **Playwright-based solutions**, evaluating migration candidates, redesigning reusable components, improving synchronization, and reducing brittle or high-maintenance regression tests.
- Perform API and data validation using **Postman, REST/JSON services, SQL Server, and reconciliation queries**, verifying backend integrations, transaction processing, calculations, business rules, and data integrity across connected systems.
- Integrate automated suites with **Azure DevOps, TeamCity, Git, and CI/CD pipelines**, enabling continuous regression, parallel execution, automated quality gates, build validation, and dependable release-readiness feedback.
- Troubleshoot automation failures through logs, traces, SQL, API responses, screenshots, and debugging while conducting root-cause analysis and recommending architectural or test-design improvements that strengthen framework reliability.
- Participate in framework design discussions, automation code reviews, sprint planning, refinement, estimation, and release activities while mentoring peers on Playwright, coding practices, troubleshooting, and modern Quality Engineering standards.

Environments: Playwright, TypeScript, C#, Selenium WebDriver, NUnit, REST APIs, Postman, SQL Server, Azure DevOps, TeamCity, Git, CI/CD, Azure, OOP, SOLID, Design Patterns, Framework Architecture, Regression Automation, Agile/Scrum.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

Chicago, IL, USA

- Developed maintainable UI, API, integration, and regression automation using **TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, and SQL** across high-volume healthcare and client-facing SaaS applications.
- Built reusable automation components including page abstractions, fixtures, API utilities, test-data helpers, and shared libraries while applying object-oriented design and clean-code practices to improve long-term maintainability.
- Expanded Playwright-based coverage for critical customer workflows while identifying Selenium scenarios suitable for modernization, improving execution reliability and reducing repetitive manual regression effort across releases.
- Performed REST API and backend validation using **Postman, Swagger/OpenAPI, RESTAssured, JSON, and SQL**, verifying integrations, calculations, error handling, data consistency, and downstream business processing.
- Integrated automated suites with **Jenkins, GitLab/GitHub, Git, and CI/CD pipelines**, enabling continuous testing, automated regression, rapid build feedback, quality gates, and reliable release validation.
- Investigated brittle and failed tests using Splunk, application logs, API responses, SQL diagnostics, and browser traces while partnering with engineers to isolate root causes and implement sustainable fixes.
- Collaborated with Software Engineers, Product Owners, analysts, and SDETs during Agile planning and code reviews while mentoring team members on automation development, framework usage, debugging, and quality-risk identification.

Environments: TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, Postman, Swagger/OpenAPI, SQL, Jenkins, GitLab/GitHub, Git, CI/CD, AWS/Azure, Splunk, Framework Design, Code Reviews, Regression Testing, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Designed and maintained reusable automation solutions using **Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise SaaS applications and integrated business services.

- Applied object-oriented programming, Page Object Model, reusable design patterns, clean-code standards, and modular framework components to improve automation extensibility, readability, and maintainability across regression suites.
- Developed UI, API, integration, and end-to-end automation while continuously identifying repetitive manual scenarios, coverage gaps, unstable tests, and opportunities to strengthen automated regression effectiveness.
- Performed service and data validation using **Postman, SoapUI, REST/SOAP APIs, JSON, XML, and SQL**, ensuring accurate backend processing, cross-application integrations, business calculations, and database consistency.
- Integrated test automation with **Jenkins, Git, Maven, and CI/CD pipelines**, providing continuous regression feedback, automated build validation, execution reporting, and reliable software-release verification.
- Troubleshoot automation failures using logs, API responses, SQL analysis, and debugging techniques while refactoring shared components and synchronization logic to improve test stability and framework reliability.
- Participated in technical design discussions, code reviews, sprint planning, backlog refinement, and release activities while sharing automation practices and mentoring peers on reusable test architecture and troubleshooting.

Environments: Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, REST APIs, SQL, Jenkins, Git, Maven, CI/CD, Enterprise SaaS, OOP, Design Patterns, Framework Maintenance, Code Reviews, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and maintained automated functional, integration, regression, and end-to-end suites using **Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise web applications.
- Built reusable page objects, test-data utilities, common libraries, and automation helpers using object-oriented principles and structured design patterns, reducing duplicated code and simplifying regression maintenance.
- Converted repetitive manual scenarios into automated coverage while evaluating test value, execution stability, and maintenance cost to improve regression efficiency without sacrificing critical business-path validation.
- Performed REST API and database validation using **Postman, SoapUI, JSON/XML, and SQL queries**, verifying service interactions, backend calculations, data processing, and consistency across integrated applications.
- Integrated automation with **Jenkins, Git, and CI/CD pipelines**, supporting scheduled regression execution, automated build verification, earlier defect detection, and repeatable release-quality checks.
- Investigated test failures through logs, screenshots, API responses, database records, and debugging while collaborating with developers to isolate application versus automation issues and validate corrective fixes.
- Worked within Agile teams to review requirements, participate in sprint ceremonies, communicate testing status, improve automation practices, and support peers with framework maintenance, reusable coding patterns, and defect troubleshooting.

Environments: Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, SoapUI, REST APIs, SQL, Jenkins, Git, CI/CD, OOP, Page Object Model, Design Patterns, Regression Automation, Framework Maintenance, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
