

Vishal Kumar Allam

Cincinnati, OH | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Software Engineer in Test / Quality Engineering professional with over **6+ years** of experience delivering automation across Android mobile, API, web, backend, and enterprise applications throughout the full software development lifecycle.
- Strong hands-on expertise with **Java, Appium, Selenium WebDriver, REST APIs, SQL, Playwright, TestNG, JUnit, and Cucumber BDD**, developing reliable functional, regression, integration, and end-to-end automated test suites.
- Experienced designing mobile automation frameworks using **Page Object Model (POM), Hybrid Testing Frameworks, reusable utilities, data-driven components, and maintainable test architecture** for Android applications and connected services.
- Hands-on experience testing Android applications across **physical devices and emulators**, validating complex user journeys, device-specific behavior, API integrations, data flows, and regression scenarios.
- Strong CI/CD experience integrating automated tests with **GitHub Actions, Jenkins, Maven, Azure DevOps, Git, and Git flow**, supporting continuous delivery, regression execution, automated quality controls, and release management.
- Experienced creating automated test-reporting infrastructure, analyzing test trends, managing defects, validating RESTful APIs and SQL data, and performing performance/load testing using **JMeter, Gatling, and k6**.
- Collaborative Quality Engineer experienced with **SAFe Agile, Scrum, Kanban, Jira, Confluence, QMetry/Zephyr, shift-left testing, root-cause analysis, and AI-assisted tools such as GitHub Copilot, Cursor, and Claude**.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Mobile Automation:** Java, C#, TypeScript, JavaScript, Python, SQL, Appium, Selenium WebDriver, Playwright, JUnit, TestNG, Cucumber BDD, Android Automation.
- **Framework Design:** Page Object Model (POM), Hybrid Testing Frameworks, Data-Driven Testing, Reusable Utilities, Test Fixtures, Shared Libraries, Modular Test Architecture, Framework Maintenance.
- **API & Database Testing:** RESTful APIs, Postman, RESTAssured, Swagger/OpenAPI, JSON, MySQL, PostgreSQL, Oracle, MS SQL, SQL Queries, Backend Validation, Data Reconciliation.
- **Mobile & Device Testing:** Android, Physical Devices, Emulators, Mobile UI Automation, Functional Testing, End-to-End Testing, Regression Testing, Device-Specific Validation, Exploratory Testing.
- **CI/CD & DevOps:** GitHub Actions, Jenkins, Maven, Azure DevOps, Git, Git Flow, CI/CD Pipelines, Release Management, Automated Quality Gates, Build Validation, Continuous Delivery.
- **Test Management & Performance:** Jira, Confluence, QMetry, Zephyr, Defect Management, Test Planning, Test Reporting, JMeter, Gatling, k6, Performance Testing, Load Testing, Trend Analysis.
- **Cloud, AI & Engineering Practices:** AWS, Microsoft Azure, Linux, SSH, Shell Scripting, GitHub Copilot, Cursor, Claude, AI-Assisted QA, SAFe, Scrum, Kanban, Shift-Left Testing, Root Cause Analysis.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

Cincinnati, OH, USA

- Analyze system requirements, user stories, technical specifications, and acceptance criteria to define comprehensive **functional, regression, integration, API, and end-to-end testing** across enterprise and mobile-connected workflows.
- Develop and maintain automated test suites using **Java/C#, Appium-style mobile automation, Playwright, Selenium WebDriver, REST APIs, and SQL**, applying Page Object Model and reusable Hybrid Framework principles.
- Validate Android-oriented user journeys, backend dependencies, RESTful services, and database updates while creating reusable page objects, data utilities, test fixtures, and shared automation components to improve maintainability.
- Integrate automated regression suites with **Azure DevOps, TeamCity/GitHub Actions-style CI/CD pipelines, Git, and Git flow**, supporting continuous execution, automated quality controls, deployment validation, and release readiness.
- Design and maintain test-reporting capabilities that provide visibility into execution status, failed scenarios, defect trends, regression stability, and release-quality indicators for technical and business stakeholders.
- Investigate failed automation using logs, API responses, SQL results, browser/device evidence, and environment diagnostics while applying structured debugging and root-cause analysis to distinguish application defects from test issues.
- Use **GitHub Copilot, Cursor, and Claude** to accelerate test-case creation, automation development, execution analysis, and bug reporting while contributing to Agile ceremonies, shift-left testing, code reviews, and continuous improvement.

Environments: Java, C#, Appium, Playwright, Selenium WebDriver, POM, Hybrid Framework, REST APIs, Postman, SQL Server, Azure DevOps, TeamCity, Git, Git Flow, CI/CD, GitHub Actions Concepts, Jira, AI-Assisted QA, Root Cause Analysis, Agile/Scrum.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

Cincinnati, OH, USA

- Developed automated mobile, API, and web validation using **Java, Appium, Selenium WebDriver, Playwright, RESTAssured, TestNG, and SQL** across healthcare applications and complex patient-facing workflows.
- Built Android automation following **Page Object Model and Hybrid Framework** principles, creating reusable screen objects, test-data utilities, service helpers, and execution components for maintainable regression coverage.
- Executed automated tests across Android devices and emulators while validating platform behavior, UI workflows, RESTful API interactions, backend processing, and data consistency across integrated healthcare systems.
- Integrated automation with **Jenkins, GitHub/GitLab, Git, Maven, and CI/CD pipelines**, supporting continuous regression, automated build validation, parallel test execution, and dependable release-management feedback.
- Performed REST API and database testing using Postman, RESTAssured, JSON, SQL, and backend reconciliation while validating service contracts, data processing, error handling, and cross-system integration behavior.
- Created execution reports and analyzed defect, regression, and performance trends while using JMeter-style workload testing to identify response-time, stability, and throughput issues before healthcare releases.
- Collaborated with developers, Product Owners, analysts, and QA engineers in Agile/Scrum ceremonies while using AI-assisted tools to accelerate test development, debugging, defect documentation, and regression analysis.

Environments: Java, Appium, Selenium WebDriver, Playwright, TestNG, RESTAssured, Postman, Android Devices/Emulators, POM, Hybrid Framework, SQL, Jenkins, Maven, GitHub/GitLab, Git, CI/CD, JMeter, Healthcare Applications, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Developed and maintained automated functional, regression, integration, and end-to-end testing using **Java, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise applications.
- Applied Page Object Model, modular framework design, reusable test utilities, configuration management, and data-driven patterns to improve automation reliability, maintainability, and coverage across frequently changing application functionality.

- Performed Android/mobile validation using Appium and emulator-based testing while verifying application workflows, API integrations, device-specific behavior, backend processing, and regression scenarios.
- Validated RESTful APIs and databases using **Postman, REST/SOAP services, JSON/XML, MySQL/Oracle-style queries, and backend reconciliation**, confirming service behavior and cross-system data consistency.
- Integrated automated suites with **Jenkins, Maven, Git, and CI/CD pipelines**, supporting scheduled regression, build validation, continuous feedback, and repeatable testing throughout Agile software-development cycles.
- Executed performance and load scenarios using JMeter, application logs, and API metrics while analyzing latency, throughput, failure behavior, and system reliability under production-like workloads.
- Participated in sprint planning, refinement, reviews, retrospectives, defect triage, and automation reviews while contributing to shift-left practices, framework improvements, technical documentation, and knowledge sharing.

Environments: Java, Selenium WebDriver, Appium, Cucumber BDD, JUnit, TestNG, POM, Postman, REST/SOAP APIs, SQL, MySQL/Oracle, Jenkins, Maven, Git, CI/CD, JMeter, Android Testing, Framework Development, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed automated and manual testing across web, mobile, API, and backend applications using **Java, Appium, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL**.
- Created mobile automation using Page Object Model and reusable framework components while validating functional, regression, integration, and end-to-end scenarios across Android application workflows.
- Executed Android tests across physical/emulated devices, validating navigation, UI behavior, business workflows, API dependencies, data synchronization, and device-specific application behavior across supported configurations.
- Performed REST API and backend testing using **Postman, REST/SOAP services, JSON/XML, and SQL queries**, ensuring accurate request-response behavior, data integrity, error handling, and downstream processing.
- Integrated automated regression with **Jenkins, Maven, Git, and CI/CD pipelines**, enabling scheduled execution, build-level validation, continuous test feedback, and earlier identification of release-impacting defects.
- Logged and managed defects using Jira, maintained detailed test documentation and execution evidence, and investigated failed tests through logs, screenshots, API responses, SQL records, and structured root-cause analysis.
- Worked within Agile/Scrum teams during sprint planning, daily stand-ups, reviews, retrospectives, and defect triage while contributing to test-plan creation, release validation, framework maintenance, and continuous QA improvements.

Environments: Java, Appium, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, POM, Android Devices/Emulators, Postman, REST/SOAP APIs, JSON/XML, SQL, Jenkins, Maven, Git, Jira, CI/CD, Regression Testing, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
