

Vishal Kumar Allam

New York, NY | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- QA Automation Engineer with over **6+ years** of experience designing, developing, and maintaining robust automated testing solutions across healthcare, financial, web, API, and enterprise applications.
- Strong hands-on expertise with **Playwright, TypeScript, JavaScript, Selenium WebDriver, C#, Java, Python, REST APIs, and SQL**, delivering maintainable UI and API automation across functional, regression, integration, and end-to-end coverage.
- Experienced building reusable automation frameworks, shared utilities, test-data components, API clients, and page abstractions while continuously improving test reliability, maintainability, execution speed, and overall regression effectiveness.
- Strong API automation experience using **Postman, RESTAssured, Playwright API testing, JSON, Swagger/OpenAPI, and backend database validation**, supporting reliable healthcare and payment-oriented transaction workflows.
- Hands-on experience integrating automated suites with **GitHub Actions, Azure DevOps, Jenkins, Git, and CI/CD pipelines**, providing fast quality feedback and dependable release validation throughout Agile delivery.
- Experienced using **GitHub Copilot, Cursor, and Claude** to accelerate test development, debug failures, refactor automation code, generate edge cases, and improve engineering productivity while validating AI-generated changes before adoption.
- Self-directed and collaborative Quality Engineer experienced in test planning, requirement clarification, defect reporting, QA documentation, K6-style performance testing, AWS environments, and working across Product, Engineering, and QA teams.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Automation:** TypeScript, JavaScript, C#, Java, Python, SQL, Playwright, Selenium WebDriver, Cypress, NUnit, XUnit, JUnit, TestNG, Cucumber BDD.
- **UI & API Testing:** Playwright UI/API Automation, REST API Testing, Postman, RESTAssured, Swagger/OpenAPI, JSON, Functional Testing, Regression Testing, Integration Testing, End-to-End Testing.
- **Framework Engineering:** Page Object Model, Reusable Utilities, API Clients, Fixtures, Test Data Management, Shared Assertions, Modular Frameworks, Automation Maintenance, Test Reliability.
- **CI/CD & Source Control:** GitHub Actions, Git, GitHub, Azure DevOps, Jenkins, GitLab CI/CD, Pull Requests, Branching, Automated Quality Gates, Continuous Testing, Release Validation.
- **Performance & Cloud:** K6, JMeter, Performance Testing, Load Testing, Response-Time Analysis, AWS, Cloud Environments, API Performance Validation, Scalability and Reliability Testing.
- **AI-Assisted Development:** GitHub Copilot, Cursor, Claude, AI-Assisted Test Generation, Debugging, Code Refactoring, Edge-Case Discovery, Failure Analysis, Automation Productivity.
- **Quality Engineering:** Test Planning, Test Strategy, Requirement Analysis, Acceptance Criteria, Defect Reporting, Test Documentation, Agile/Scrum, Root Cause Analysis, Payments, Healthcare Technology, Continuous Improvement.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

New York, NY, USA

- Design, develop, and maintain automated UI and API test suites using **Playwright, TypeScript/C#, Selenium WebDriver, REST APIs, and SQL**, covering functional, regression, integration, and end-to-end enterprise workflows.
- Contribute to test planning and strategy by reviewing requirements, acceptance criteria, technical designs, and business flows to determine appropriate automation coverage, identify missing scenarios, and prioritize high-risk functionality.
- Build reusable automation components including page abstractions, API helpers, fixtures, shared assertions, and test-data utilities while improving framework maintainability, execution reliability, and long-term regression scalability.
- Perform API and backend validation using **Postman, Playwright API testing, REST/JSON payloads, and SQL Server**, verifying service behavior, transaction processing, integrations, data accuracy, and error handling.
- Integrate automated testing with **Azure DevOps, TeamCity/GitHub-style CI/CD pipelines, and Git**, enabling continuous regression execution, rapid feedback, automated quality gates, and reliable release-readiness decisions.
- Analyze failed automation using application logs, browser traces, API responses, SQL results, test data, and environment evidence while documenting detailed defects and collaborating with developers through resolution and retesting.
- Use **GitHub Copilot, Cursor, and Claude** to accelerate Playwright development, debugging, test refactoring, edge-case discovery, and documentation while proactively owning test coverage, automation workflows, and QA process improvements.

Environments: Playwright, TypeScript, C#, Selenium WebDriver, REST APIs, Postman, SQL Server, Git, Azure DevOps, TeamCity, CI/CD, GitHub Actions Concepts, Copilot, Cursor, Claude, K6/JMeter, AWS, Regression Testing, Root Cause Analysis, Agile/Scrum.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

New York, NY, USA

- Developed automated UI, API, and end-to-end validation using **TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, and SQL** across healthcare applications and client-facing digital workflows.
- Translated user stories, acceptance criteria, and business requirements into comprehensive functional, regression, integration, and end-to-end scenarios while proactively clarifying incomplete requirements with Product and Engineering teams.
- Created reusable framework components, API clients, shared utilities, and test-data helpers that reduced duplicate automation code and improved reliability across frequently executed regression suites.
- Validated REST APIs and backend integrations using **Postman, RESTAssured, JSON, SQL, and Swagger/OpenAPI**, covering healthcare transaction workflows, data processing, validation rules, and cross-system consistency.
- Integrated automated suites with **Jenkins, GitHub/GitLab, Git, and CI/CD pipelines**, supporting continuous regression, automated build validation, rapid developer feedback, and dependable release confidence.
- Performed performance validation using K6/JMeter-style workloads and application telemetry while investigating response times, throughput, service stability, and API behavior under concurrent transaction volumes.
- Leveraged AI coding assistants to accelerate automation development and debugging while collaborating with developers, Product Managers, and QA engineers on defect resolution, documentation, release readiness, and continuous process improvement.

Environments: TypeScript, JavaScript, Playwright, Selenium WebDriver, RESTAssured, Postman, Swagger/OpenAPI, JSON, SQL, Jenkins, GitHub/GitLab, Git, CI/CD, K6/JMeter, AWS, Healthcare Applications, AI-Assisted Development, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Developed maintainable UI, API, integration, and regression automation using **Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise web applications.
- Reviewed requirements, technical specifications, and acceptance criteria to create structured testing coverage while identifying missing scenarios, integration dependencies, boundary conditions, and opportunities for automation.

- Built reusable framework utilities, page components, API abstractions, configuration modules, and test-data helpers while applying modular design practices to improve scalability and maintainability.
- Performed backend and API validation using **Postman, SoapUI, REST/SOAP interfaces, JSON/XML, and SQL**, ensuring correct business processing, integrations, data integrity, and application behavior.
- Integrated regression suites with **Jenkins, Git, Maven, and CI/CD pipelines**, enabling automated build validation, repeatable regression execution, faster defect detection, and continuous quality feedback.
- Investigated failed and intermittent tests using logs, API responses, SQL queries, screenshots, and debugging techniques while collaborating with developers to identify root causes and validate corrective changes.
- Participated in Agile sprint planning, reviews, retrospectives, test reviews, and documentation efforts while continuously improving automation standards, test coverage, framework reliability, and team quality practices.

Environments: Java, JavaScript, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, SoapUI, REST APIs, JSON/XML, SQL, Jenkins, Git, Maven, CI/CD, Framework Development, Regression Testing, RCA, Agile/Scrum.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed manual and automated UI, API, functional, regression, integration, and end-to-end tests using **Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL**.
- Analyzed user stories and acceptance criteria to create comprehensive test scenarios, test data, and automation coverage while identifying negative, boundary, integration, and business-critical cases early.
- Created reusable Selenium/Cucumber framework components, shared utilities, data-driven helpers, and page objects to improve automation maintainability and reduce repeated implementation across regression suites.
- Performed REST/SOAP API validation using **Postman, JSON/XML payloads, SQL queries, and backend checks**, confirming request-response behavior, business rules, data processing, and integration reliability.
- Integrated automated regression suites with **Jenkins, Git, and CI/CD pipelines**, supporting scheduled execution, continuous build validation, consistent test results, and earlier identification of application defects.
- Analyzed failed test executions through logs, screenshots, API responses, database records, and test data while documenting defects with detailed reproduction steps and collaborating with developers through resolution.
- Participated in sprint ceremonies, test reviews, defect triage, documentation, and release activities while independently managing assigned testing responsibilities and contributing to continuous improvements in QA processes.

Environments: Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, REST/SOAP APIs, JSON/XML, SQL, Jenkins, Git, CI/CD, Functional/Regression/API Testing, Test Documentation, Defect Management, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
