

# Vishal Kumar Allam

Austin, TX | 816-666-2813 | [itsmevishal36@gmail.com](mailto:itsmevishal36@gmail.com) | **Work Authorization: H1B**

## PROFESSIONAL SUMMARY

- Senior Quality Engineering professional with over **6+ years** of experience defining quality strategies and building scalable automated testing solutions across enterprise, cloud, API-driven, and AI-powered software products.
- Strong programming and automation expertise with **Python, TypeScript, Java, C#, Playwright, Selenium WebDriver, REST APIs, SQL, and reusable test frameworks**, supporting unit, integration, API, end-to-end, performance, and regression testing.
- Hands-on experience testing **AI-powered applications and intelligent workflows**, validating feature quality, reliability, consistency, effectiveness, integration behavior, and end-to-end user outcomes across complex software systems.
- Experienced developing AI evaluation approaches using structured test scenarios, evaluation datasets, expected outcomes, regression baselines, response-quality criteria, and measurable quality indicators for AI-driven features.
- Strong experience integrating automated testing with **CI/CD pipelines, test data management, regression-prevention controls, automated quality gates, and continuous validation** to improve release safety and engineering confidence.
- Experienced using **GitHub Copilot, Cursor, Claude, and AI-assisted development workflows** to accelerate test generation, debugging, failure analysis, code refactoring, coverage improvement, and automation maintenance.
- Quality-focused technical leader experienced monitoring production quality metrics, analyzing customer feedback and system insights, mentoring engineers, identifying risks, and driving continuous improvement across distributed Engineering, Product, and Platform teams.

## EDUCATION

**University of Missouri Kansas City**

*"Master of Science" in Computer Science*

Kansas City, MO

Jan. 2023 – May 2024

**Jawaharlal Nehru Technological University**

*"Bachelor of Technology" in Computer Science*

Hyderabad, India

Aug. 2015 - May 2019

## TECHNICAL SKILLS

- **Programming & Automation:** Python, TypeScript, Java, C#, JavaScript, SQL, Playwright, Selenium WebDriver, Cypress, Pytest, JUnit, TestNG, NUnit, Cucumber BDD.
- **AI Quality Engineering:** AI-Powered Applications, Intelligent Workflows, AI Feature Testing, AI Evaluation, Quality Measurement, Reliability Validation, Regression Baselines, AI Output Assessment, Evaluation Datasets.
- **Testing Methodologies:** Unit Testing, Integration Testing, API Testing, End-to-End Testing, Functional Testing, Regression Testing, Performance Testing, Load Testing, Exploratory Testing, Release Validation.
- **API & Test Data:** REST APIs, Postman, Swagger/OpenAPI, JSON, SQL Server, PostgreSQL, MySQL, Test Data Management, Data Validation, Backend Testing, Service Integration Testing.
- **CI/CD & DevOps:** GitHub Actions, Azure DevOps, Jenkins, GitLab CI, Git, CI/CD Pipelines, Automated Quality Gates, Continuous Validation, Parallel Test Execution, Regression Prevention.
- **AI-Assisted Development & Monitoring:** GitHub Copilot, Cursor, Claude, AI-Assisted Test Generation, Debugging, Code Refactoring, Production Quality Metrics, Logging, Monitoring, Failure Analysis.
- **Quality Leadership:** Quality Strategy, Automation Framework Architecture, Quality Platforms, Risk Analysis, Root Cause Analysis, Release Confidence, Code Reviews, Agile/Scrum, Distributed Teams, Continuous Improvement.

**Test Automation Engineer**

*PCMI LLC (Full Time)*

Oct 2024 – Present

*Austin, TX, USA*

- Define and evolve quality strategy for enterprise and AI-enabled capabilities by establishing test scope, automation priorities, acceptance criteria, regression protection, and release-readiness expectations across multiple application components.
- Design and maintain scalable automation frameworks using **Python/C#, Playwright, REST APIs, SQL, and reusable framework components**, supporting integration, API, end-to-end, performance, and regression validation.
- Validate AI-powered features and intelligent workflows using structured evaluation scenarios, expected outcomes, controlled test data, response-quality criteria, and repeatable regression baselines to measure reliability and effectiveness.
- Integrate automated suites with **Azure DevOps, TeamCity, Git, and CI/CD pipelines**, enabling continuous validation, parallel execution, automated quality gates, regression prevention, and faster feedback before production releases.
- Use GitHub Copilot, Cursor, and Claude to accelerate automation development, generate additional test scenarios, analyze failed executions, refactor reusable components, and improve test coverage while reviewing AI-generated changes for quality.
- Monitor production-quality signals through logs, API telemetry, defect trends, regression results, and customer-impacting issues while performing root-cause analysis and partnering with developers on durable corrective actions.
- Collaborate with Engineering, Product, and Platform stakeholders to identify risks early, review automation approaches, communicate quality status, mentor peers, and continuously improve testing standards, reliability, and release confidence.

**Environments:** Python, C#, Playwright, REST APIs, Postman, SQL Server, AI-Powered Applications, AI Evaluation, Test Data Management, Azure DevOps, TeamCity, Git, CI/CD, Quality Gates, Production Monitoring, Root Cause Analysis, Agile/Scrum.

## **SDET / QA Automation Engineer**

Dec 2023 – Sept 2024

*Client: CVS*

*Austin, TX, USA*

- Developed automated quality coverage across healthcare web applications, APIs, backend services, and integrated workflows using **TypeScript, Java, Playwright, Selenium WebDriver, RESTAssured, and SQL**.
- Created functional, integration, regression, API, and end-to-end automation strategies while collaborating with developers and Product stakeholders to identify quality risks early and improve coverage before release.
- Validated AI-assisted and data-driven application features using structured test scenarios, expected behavior, integration checks, and regression baselines to assess reliability, consistency, and workflow effectiveness.
- Integrated automated suites with **Jenkins, GitHub/GitLab, Git, and CI/CD pipelines**, providing continuous execution, fast feedback, build validation, quality gates, and reliable regression protection across Agile releases.
- Performed API and backend testing using Postman, RESTAssured, JSON, SQL, and reconciliation checks while validating service contracts, data integrity, business processing, and cross-system integrations.
- Investigated failed tests and production-like issues using Splunk, application logs, API responses, SQL diagnostics, and automation evidence while performing structured root-cause analysis and strengthening regression coverage.
- Worked across distributed Engineering, Product, DevOps, and QA teams to review test code, communicate quality metrics and risks, improve automation maintainability, and champion continuous Quality Engineering improvements.

**Environments:** TypeScript, Java, Playwright, Selenium WebDriver, RESTAssured, Postman, JSON, SQL, Jenkins, GitHub/GitLab, Git, CI/CD, Splunk, AI-Assisted Testing, API/Integration Testing, Quality Metrics, Root Cause Analysis, Agile/Scrum.

## **Software Engineer**

Sept 2021 – Dec 2022

*Infor*

*Hyderabad, India*

- Designed and maintained scalable automated testing solutions using **Python, Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL** across enterprise frontend and backend applications.
- Built reusable automation components, shared utilities, service clients, test-data helpers, and framework abstractions to improve maintainability, scalability, and adoption across multiple application modules and teams.
- Developed integration, API, end-to-end, regression, and performance coverage while identifying test gaps, complex workflow risks, and opportunities to prevent recurring defects through earlier automated validation.

- Performed API and data validation using **Postman, REST/SOAP services, JSON/XML, SQL, and backend reconciliation**, verifying service behavior, data transformations, integration consistency, and error handling.
- Integrated test automation with **Jenkins, Git, Maven, and CI/CD pipelines**, enabling repeatable regression execution, automated build validation, faster engineering feedback, and improved release confidence.
- Analyzed test failures through application logs, API responses, SQL results, and debugging techniques while performing root-cause analysis and implementing systemic framework improvements to prevent repeat regressions.
- Partnered with developers, analysts, and QA engineers across distributed Agile teams to review test designs, strengthen quality practices, share technical knowledge, and continuously improve automation reliability and testing efficiency.

**Environments:** Python, Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, REST/SOAP APIs, JSON/XML, SQL, Jenkins, Git, Maven, CI/CD, Test Data Management, Framework Architecture, Performance Testing, RCA, Agile/Scrum.

## Associate Engineer QA

June 2019 – August 2021

*Virtusa*

*Hyderabad, India*

- Developed and executed manual and automated testing across enterprise web, API, backend, and integrated applications using **Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, and SQL**.
- Created reusable functional, integration, regression, and end-to-end automation suites while maintaining structured test data and strengthening coverage of critical business workflows and system interactions.
- Performed API and backend validation using **Postman, REST/SOAP services, JSON/XML, and SQL**, ensuring accurate service responses, business-rule execution, data integrity, and cross-system behavior.
- Integrated automated regression suites with **Jenkins, Git, and CI/CD pipelines**, supporting continuous test execution, automated build checks, faster defect detection, and consistent release-quality feedback.
- Executed performance-oriented testing using JMeter and service diagnostics while evaluating response times, stability, throughput, and failure behavior across integrated enterprise application workflows.
- Investigated failed and intermittent tests using logs, screenshots, API responses, SQL records, and debugging techniques while collaborating with developers to isolate root causes and validate permanent fixes.
- Participated in Agile ceremonies, test reviews, defect triage, and release activities while contributing to reusable testing standards, automation improvements, knowledge sharing, and continuous quality-process refinement.

**Environments:** Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, REST/SOAP APIs, JSON/XML, SQL, Jenkins, Git, CI/CD, Integration/E2E Testing, Performance Testing, Test Data Management, Root Cause Analysis, Agile/Scrum.

## AWARDS & ACHIEVEMENTS

---

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
