

Vishal Kumar Allam

Charlotte, NC | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Quality Assurance professional with over **6+ years** of experience analyzing complex requirements, use cases, and technical designs to develop comprehensive test strategies across enterprise, financial, healthcare, and regulated software environments.
- Strong experience executing **functional, system integration, regression, end-to-end, and User Acceptance Testing (UAT)**, with emphasis on usability, business-process validation, traceability, and production-readiness assessment.
- Experienced supporting **financial systems, payments, banking-style transaction processing, regulated applications, and backend data validation**, including reconciliation, report queries, database verification, and business-rule validation.
- Knowledge of **X9 file processing, X9 record types, X9 Assist/X9 Editor concepts, payment-file validation, field-level verification, and exception handling** across transaction-oriented workflows.
- Proficient in developing test designs from business requirements, technical specifications, process flows, and use cases while identifying quality risks, usability concerns, missing scenarios, and integration dependencies early.
- Experienced documenting and communicating **test execution progress, defects, risks, traceability, test results, and release readiness** to QA Management, technical teams, Product Owners, and Line of Business stakeholders.
- Collaborative Quality Engineer with strong experience in **Agile/Scrum, SAFe, SDLC, STLC, mentoring, defect triage, process improvement, and quality governance**, capable of independently managing priorities and deadlines.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Testing Methodologies:** Functional Testing, System Integration Testing, UAT, Regression Testing, End-to-End Testing, Exploratory Testing, Usability Testing, Risk-Based Testing, Test Design, Traceability.
- **Banking & Payments:** Financial Systems, Banking Operations, Payment Processing, Transaction Validation, X9 Files, X9 Record Types, X9 Assist, X9 Editor, Payment Reconciliation, Exception Processing.
- **Data & Backend Testing:** SQL, SQL Server, Oracle, PostgreSQL, Report Queries, Data Validation, Backend Testing, Data Reconciliation, Cross-System Verification, Business Rule Validation.
- **Automation & API Testing:** Playwright, Selenium WebDriver, C#, Java, Python, REST APIs, Postman, SoapUI, RESTAssured, JSON, XML, NUnit, XUnit, JUnit, TestNG.
- **Test Management & Defects:** Jira, Azure DevOps, Azure Test Plans, TestRail, qTest, Defect Tracking, Defect Triage, Test Evidence, Test Results, Risk Reporting, Release Readiness.
- **Delivery & Process:** Agile/Scrum, SAFe, SDLC, STLC, Requirements Reviews, Technical Design Reviews, Sprint Planning, Backlog Refinement, CI/CD, Change Impact Analysis, Entry/Exit Criteria.
- **Leadership & Quality:** Line of Business Reviews, QA Management Reporting, Test Analyst Mentoring, Process Improvement, Quality Standards, Documentation, Stakeholder Communication, Prioritization, Problem Solving.

Test Automation Engineer

PCMI LLC (Full Time)

Oct 2024 – Present

Charlotte, NC, USA

- Analyze complex business requirements, use cases, acceptance criteria, and technical designs to create detailed test designs covering **functional, integration, regression, usability, and UAT scenarios** across enterprise applications.
- Maintain requirement-to-test traceability and perform change-impact analysis to confirm that product and service enhancements receive appropriate coverage across critical user journeys, backend processes, and integrated systems.
- Execute system integration and end-to-end validation using **C#, Playwright, Selenium WebDriver, REST APIs, Postman, and SQL**, verifying application behavior, data processing, calculations, and cross-system consistency.
- Perform backend and report-query validation using SQL Server to reconcile transactional data, verify business rules, investigate processing exceptions, and ensure user-facing results accurately reflect underlying system records.
- Identify defects and quality risks, document clear reproduction details and evidence, validate fixes, and communicate **execution progress, defect status, dependencies, and release risks** to QA leadership and business stakeholders.
- Participate in requirements reviews, technical-design discussions, sprint planning, backlog refinement, defect triage, demos, and release-readiness reviews while highlighting usability, testability, and operational concerns early.
- Provide mentoring and guidance to QA peers on test design, automation, traceability, debugging, and defect analysis while leading process-improvement activities that strengthen SDLC/STLC discipline and regression effectiveness.

Environments: C#, Playwright, Selenium WebDriver, REST APIs, Postman, SQL Server, Azure DevOps, Azure Test Plans, Jira, TeamCity, Git, Functional Testing, System Integration Testing, UAT, Traceability, Backend Validation, Agile/Scrum, SDLC/STLC.

SDET / QA Automation Engineer

Dec 2023 – Sept 2024

Client: CVS

Charlotte, NC, USA

- Reviewed business requirements, user stories, workflows, and technical specifications to design structured test coverage for **functional, regression, system integration, end-to-end, and UAT-readiness testing** across regulated enterprise applications.
- Developed and executed automated and manual validation using **Java, TypeScript, Playwright, Selenium WebDriver, RESTAssured, Postman, and SQL**, covering user interfaces, APIs, databases, and interconnected business services.
- Performed backend data validation and report-query analysis to confirm transaction accuracy, calculations, data transformations, and consistency between frontend workflows, REST services, and database records.
- Maintained traceability between requirements, test scenarios, defects, and regression coverage while assessing the downstream impact of requirement and design changes across multiple integrated applications.
- Documented defects in Jira/TestRail with clear reproduction steps, expected and actual results, severity, and supporting evidence while coordinating with developers to validate fixes and prevent recurring regressions.
- Reported testing progress, open defects, quality risks, and release-readiness status to technical and non-technical stakeholders while supporting defect triage, UAT preparation, and business-facing quality reviews.
- Worked within Agile/Scrum delivery teams to mentor QA peers, manage multiple concurrent priorities, support rapidly changing requirements, and recommend improvements to testing standards, documentation, and execution efficiency.

Environments: Java, TypeScript, Playwright, Selenium WebDriver, RESTAssured, Postman, SQL, Jira, TestRail, Jenkins, Git, CI/CD, Functional Testing, Integration Testing, Regression Testing, UAT Readiness, Traceability, Backend Testing, Agile/Scrum.

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Analyzed requirements, use cases, business workflows, and technical designs to develop structured test cases covering functional, system integration, regression, usability, and end-to-end scenarios across enterprise applications.
- Executed automated and manual testing using **Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, Postman, and SQL**, validating frontend functionality, service integrations, and backend processing.
- Performed SQL-based backend validation, report queries, reconciliation, and source-to-target checks to verify data transformations, calculations, application state changes, and consistency across integrated systems.

- Maintained traceability across requirements, test cases, execution evidence, and defects while reviewing change requests to determine regression scope and potential quality or usability impacts.
- Tracked defects through Jira/qTest, communicated testing progress and unresolved risks, validated developer fixes, and executed targeted regression testing to confirm changes did not impact existing functionality.
- Participated in Agile/Scrum ceremonies, technical reviews, defect triage, and release activities while collaborating with developers, analysts, and business stakeholders to clarify requirements and improve testability.
- Contributed to QA process improvements by standardizing reusable test documentation, reviewing peer test designs, mentoring team members, and strengthening SDLC/STLC practices across multiple delivery workstreams.

Environments: Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, REST APIs, Postman, SQL, Jenkins, Git, Maven, Jira, qTest, Functional Testing, System Integration Testing, Regression Testing, Traceability, Backend Validation, Agile/Scrum, SDLC/STLC.

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and executed detailed test cases from business requirements, process flows, use cases, and technical specifications across **functional, integration, regression, end-to-end, and User Acceptance Testing** activities.
- Validated transaction-oriented and payment-style workflows across web applications, APIs, databases, and downstream systems using **Java, Selenium WebDriver, Postman, REST/SOAP services, JSON/XML, and SQL**.
- Supported structured-file and transaction validation by reviewing field-level records, data formats, processing rules, exception scenarios, and backend outputs, building foundational experience relevant to **X9-style payment file processing**.
- Performed backend testing and report-query validation using SQL to reconcile transactions, confirm calculations, identify data discrepancies, and verify consistency between user-facing functionality and system-of-record data.
- Maintained requirement and test-case traceability while logging defects in Jira with expected versus actual behavior, reproduction steps, screenshots/logs, severity, and business impact for efficient triage and resolution.
- Participated in requirement walkthroughs, Scrum ceremonies, defect triage, regression cycles, and UAT-support activities while communicating test execution status, dependencies, and quality risks to project stakeholders.
- Collaborated with senior QA analysts, developers, and business teams to improve test procedures, reusable documentation, entry/exit criteria, regression practices, and overall adherence to SDLC and STLC quality standards.

Environments: Java, Selenium WebDriver, Cucumber BDD, JUnit, TestNG, Postman, REST/SOAP APIs, JSON/XML, SQL, Jenkins, Git, Jira, Payment/Transaction Testing, X9 File Concepts, Backend Validation, UAT, Regression Testing, SDLC/STLC, Agile/Scrum.

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
