

Vishal Kumar Allam

Chicago, IL | 816-666-2813 | itsmevishal36@gmail.com | **Work Authorization: H1B**

PROFESSIONAL SUMMARY

- Results-driven **Software Development Engineer in Test / QA Automation Engineer** with **6+ years of experience** designing, developing, and maintaining scalable automation solutions for enterprise web applications, digital products, and REST API platforms.
- Strong hands-on expertise building **front-end automation using Playwright and JavaScript/TypeScript** and validating backend APIs using Postman, REST Assured, JSON, YAML, and service-level integration testing techniques.
- Experienced converting complex **manual test cases into reusable automated scenarios** within existing automation frameworks while improving regression coverage, execution reliability, maintainability, and release confidence.
- Extensive experience with **test planning, bug reporting, unit testing, feature testing, regression testing, smoke testing, risk-based testing, end-to-end testing, and code coverage analysis.**
- Strong database validation experience using **SQL and relational databases** including PostgreSQL, MySQL, Oracle, and SQL Server, with expertise validating backend transactions, data integrity, and application-to-database consistency.
- Hands-on experience integrating automated tests with **GitHub, GitHub Actions, CI/CD workflows, Docker, Snyk, and Wiz**, supporting continuous testing, containerized execution, security scanning, and quality validation throughout the SDLC.
- Experienced working in fast-paced **Agile/Scrum sprint cycles** with Development, QA, Product, DevOps, and leadership teams, clearly communicating testing results, recommendations, coverage gaps, risks, and release-readiness concerns.

EDUCATION

University of Missouri Kansas City

"Master of Science" in Computer Science

Kansas City, MO

Jan. 2023 – May 2024

Jawaharlal Nehru Technological University

"Bachelor of Technology" in Computer Science

Hyderabad, India

Aug. 2015 - May 2019

TECHNICAL SKILLS

- **Programming & Web Technologies:** JavaScript, TypeScript, Java, C#, Python, SQL, HTML5, CSS3, JSON, YAML
- **Test Automation:** Playwright, Selenium WebDriver, Cucumber BDD, TestNG, JUnit, XUnit, Jest, Page Object Model, Data-Driven Testing, Automated Regression Frameworks
- **API & Backend Testing:** Postman, REST Assured, Swagger/OpenAPI, SoapUI, REST APIs, HTTP Methods, JSON Validation, API Contract Testing, Integration Testing
- **Testing Methodologies:** Test Planning, Unit Testing, Feature Testing, Regression Testing, Smoke Testing, Risk-Based Testing, Functional Testing, End-to-End Testing, Code Coverage Analysis
- **Databases:** PostgreSQL, MySQL, Oracle, SQL Server, Relational Databases, Advanced SQL Queries, Data Validation, Backend Verification
- **CI/CD, DevOps & Security:** GitHub, GitHub Actions, GitHub Workflows, Git, Jenkins, TeamCity, Docker, CI/CD Pipelines, Snyk, Wiz, Security Scanning
- **Agile & Quality Management:** Jira, Agile Scrum, Sprint Planning, Backlog Refinement, Bug Tracking, Defect Management, Test Coverage, Risk Assessment, Test Reporting, Cross-Functional Collaboration

EXPERIENCE

Test Automation Engineer *PCMI LLC (Full Time)*

Oct 2024 – Present
Chicago, IL, USA

- Designed and maintained scalable automation solutions for enterprise digital applications using **Playwright, JavaScript, TypeScript, Selenium WebDriver, and reusable Page Object Model components** to improve front-end test coverage and regression reliability.
- Converted detailed manual test cases and business scenarios into automated Playwright tests, organizing reusable fixtures, utilities, test data, selectors, and validation logic within existing automation frameworks.
- Built comprehensive front-end and API automation covering critical business workflows, validating REST endpoints with **Postman, REST Assured, JSON payloads, HTTP methods, response schemas, authentication, and negative scenarios**.
- Created and maintained detailed test plans supporting **unit, feature, functional, integration, regression, smoke, risk-based, API, database, and end-to-end testing** across sprint and release cycles.
- Analyzed automated test and **code coverage** reports to identify untested application paths, high-risk functionality, regression gaps, and opportunities to expand automated coverage across critical user journeys.
- Performed backend data validation using SQL against relational databases including PostgreSQL, MySQL, and Oracle to verify transactions, application state, business rules, data consistency, and API-to-database behavior.
- Integrated Playwright and API automation suites into **GitHub, GitHub Actions, reusable workflows, Docker, and CI/CD pipelines**, enabling automated regression, smoke, and deployment validation on code changes.
- Integrated **Snyk and Wiz security scanning** into quality workflows to identify vulnerable dependencies, container risks, configuration findings, and security concerns before production deployment.
- Opened, documented, prioritized, and tracked defects in Jira with reproducible steps, logs, screenshots, API evidence, severity, risk assessment, and impact analysis while collaborating with developers through resolution.
- Presented testing results, automation coverage, release risks, defects, recommendations, and quality concerns to developers, QA engineers, Product Owners, and leadership throughout fast-paced Agile/Scrum sprint cycles.

Environment: Playwright, JavaScript, TypeScript, Selenium WebDriver, Postman, REST Assured, JSON, YAML, SQL, PostgreSQL, MySQL, Oracle, GitHub, GitHub Actions, GitHub Workflows, Docker, Snyk, Wiz, Jira, Agile Scrum, Test Planning, Unit Testing, Feature Testing, Regression Testing, Smoke Testing, Risk-Based Testing, Code Coverage, API Testing, End-to-End Testing

SDET

Dec 2023 – Sept 2024
Remote, USA

Client: CVS

- Designed and developed front-end automation for enterprise healthcare applications using **Playwright, JavaScript, TypeScript, and React Testing Library**, covering critical digital workflows across desktop and responsive web experiences.
- Converted manual functional and regression scenarios into maintainable automated Playwright tests using reusable page objects, fixtures, helper utilities, dynamic test data, assertions, and environment-specific configurations.
- Built and maintained API validation suites using **Postman and REST Assured**, validating REST endpoints, JSON payloads, response schemas, HTTP status codes, authentication, error responses, and backend business rules.
- Prepared test plans and executed **unit, feature, regression, smoke, risk-based, integration, API, database, and end-to-end testing** throughout Agile sprint and production release cycles.
- Monitored test execution and code coverage metrics, identifying functionality with insufficient coverage and collaborating with developers and Product teams to prioritize automation around high-risk healthcare workflows.
- Performed backend verification using advanced SQL queries across relational databases including MySQL, PostgreSQL, and Oracle to validate data integrity, transaction processing, API persistence, and application state.
- Integrated automated suites into **GitHub, GitHub Actions, GitHub workflows, Docker, and CI/CD pipelines**, enabling continuous test execution for pull requests, builds, deployments, and release validation.
- Supported application security quality by reviewing **Snyk and Wiz** findings, validating remediation changes, and partnering with engineering teams on dependency, container, and cloud-security concerns.
- Created detailed Jira defects containing reproducible steps, expected and actual results, screenshots, logs, API responses, severity, business impact, and risk while tracking defects through validation and closure.
- Communicated test results, coverage gaps, defects, automation progress, risks, and release recommendations to Development, QA, Product, and senior stakeholders within tight sprint timelines.

Environment: Playwright, JavaScript, TypeScript, React Testing Library, Postman, REST Assured, JSON, YAML, SQL, MySQL, PostgreSQL, Oracle, GitHub, GitHub Actions, Docker, Snyk, Wiz, Jira, Agile Scrum, Code Coverage, Feature Testing, Regression Testing, Smoke Testing, Risk-Based Testing, API Testing, Database Testing, End-to-End Testing

Software Engineer

Sept 2021 – Dec 2022

Infor

Hyderabad, India

- Developed and maintained automated test solutions for enterprise web applications using **JavaScript, Java, Selenium WebDriver, Playwright, Cucumber BDD, and TestNG**, improving automated coverage of critical product workflows.
- Converted manual functional test cases into reusable automated scenarios by designing page objects, common utilities, test data components, assertions, and framework-level reusable functions.
- Performed front-end and API testing using Playwright, Selenium, Postman, and REST Assured, validating user workflows, HTTP services, JSON/XML payloads, integration behavior, and application business rules.
- Created test plans and executed **feature, functional, integration, regression, smoke, risk-based, system, and end-to-end testing** for new functionality and monthly product releases.
- Reviewed automation and test coverage to identify high-risk modules, untested application paths, defect-prone functionality, and opportunities to improve regression coverage.
- Performed SQL-based backend validation against relational databases, verifying application data, transactions, configuration values, API persistence, and expected business outcomes.
- Integrated automated tests into Git, GitHub/Jenkins, and CI/CD workflows to support continuous regression execution, build verification, faster defect feedback, and release-readiness validation.
- Created and tracked detailed Jira defects, collaborating with Software Engineers and Product Managers to reproduce issues, analyze root causes, validate fixes, and communicate testing risks.
- Participated in Agile sprint planning, backlog refinement, daily stand-ups, test reviews, release planning, and cross-functional discussions with Development, QA, and Product teams.
- Prepared and communicated execution summaries, regression results, defect trends, coverage gaps, testing concerns, and quality recommendations to engineering and Product stakeholders.

Environment: JavaScript, Java, Playwright, Selenium WebDriver, Cucumber BDD, TestNG, Postman, REST Assured, JSON, SQL, Relational Databases, Git, GitHub, Jenkins, CI/CD, Jira, Agile Scrum, Functional Testing, Feature Testing, Regression Testing, Smoke Testing, Risk-Based Testing, Code Coverage

Associate Engineer QA

June 2019 – August 2021

Virtusa

Hyderabad, India

- Developed and maintained automation suites for web and mobile applications using **Java, JavaScript, Selenium WebDriver, Cucumber BDD, TestNG, and Appium** within enterprise QA environments.
- Converted manual regression and functional test cases into reusable automated scenarios, improving consistency and reducing repetitive manual execution across sprint releases.
- Performed front-end, API, integration, and backend testing using Selenium, Postman, REST services, JSON/XML payload validation, and SQL-based database verification.
- Created test plans and executed **unit-support, feature, functional, integration, regression, smoke, risk-based, system, UAT, and end-to-end testing** across enterprise application releases.
- Supported test coverage reviews by identifying critical business workflows, defect-prone areas, missing scenarios, and opportunities for additional automated regression coverage.
- Executed relational database queries using SQL to validate backend records, transaction processing, business rules, application state, and data consistency across integrated systems.
- Integrated automation suites with Git, Jenkins, Maven, and CI/CD pipelines to support scheduled test execution, build verification, continuous regression testing, and deployment validation.
- Logged and tracked defects using Jira, documenting reproduction steps, evidence, expected versus actual behavior, severity, priority, and business impact through resolution.
- Collaborated closely with Software Engineers, QA leads, Business Analysts, and Product teams throughout Agile/Scrum sprint cycles to resolve quality issues and meet tight delivery deadlines.
- Prepared test execution summaries, defect reports, regression results, risks, recommendations, and release-readiness updates for technical teams and project leadership.

Environment: Java, JavaScript, Selenium WebDriver, Cucumber BDD, TestNG, Appium, Postman, REST APIs, JSON, SQL, Relational Databases, Git, Jenkins, Maven, CI/CD, Jira, Agile Scrum, Test Planning, Regression Testing, Smoke Testing, Risk-Based Testing, Bug Tracking, Test Reporting

AWARDS & ACHIEVEMENTS

- 2019-11 Oracle Certified Associate, JAVA SE8 Programmer.
- ISTQB Certified Professional.
- Microsoft Technology Associate (MTA) – Database Administration Fundamentals, HTML- 5 Application Development Fundamentals.
- Awarded “Software Process Achievement” Award for my contribution towards the project in Virtusa.
- Received Customer Appreciation mails for quality releases.
